LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., January 14, 1915.

SIR:

I have the honor to transmit herewith a bulletin relating to the assessed valuation of property subject to ad valorem taxation and amounts and rates of levies of the states, counties, and other civil divisions in the United States for the census years 1860 to 1912, inclusive.

The bulletin has been prepared in connection with the decennial investigation authorized by the permanent census act pertaining to public indebtedness, valuations, taxation, revenues, and expenditures. It is published in advance of the complete report in order that the information contained in it may reach the public without delay. The statistics contained in it will be consolidated with those of other bulletins bearing upon the general investigation, already published or now in course of preparation, and such consolidated data will be published as a finished report pertaining to Wealth, Debt, and Taxation.

This bulletin was prepared under the supervision of Starke M. Grogan, chief statistician in charge of Wealth, Debt, and Taxation; John Lee Coulter, expert special agent in an advisory capacity; and Arthur J. Hirsch, chief of division.

Respectfully,

Wm J. Harris
Director of the Census.

To Hon. WILLIAM C. REDFIELD,
Secretary of Commerce.

ASSESSED VALUATION OF PROPERTY
AND
AMOUNTS AND RATES OF LEVY
1860-1912

ASSESSED VALUATION OF PROPERTY, AND AMOUNTS AND RATES OF LEVY: 1860 TO 1912.

INTRODUCTION.

Scope of report.—Under authority of the permanent census act, the Bureau of the Census publishes a decennial report with the title "Wealth, Debt, and Taxation." This report for the year 1913 will contain complete statistics of indebtedness, assessed valuations, tax rates and levies, revenue laws, and revenues and expenditures of the National Government, the 48 states, and all of the counties or parishes within the states, and all incorporated cities, towns, villages, and boroughs.

Scope of this bulletin.—This bulletin has been prepared in connection with the decennial investigation to present in advance a part of the data to be included in the complete report, and to furnish a convenient volume for reference for the use of those interested especially in the statistics of assessed valuations and tax levies. It sets forth, by states and counties, the total and per capita assessed valuations of all property, and of real property and improvements, subject to ad valorem taxation, and the total and per capita levies of taxes thereon, for the census years 1860 to 1912, inclusive; the assessed valuations by states and counties of all property within certain specified civil divisions and the taxes levied thereon in 1912; and the total and per capita assessed valuation of all property within incorporated places having 2,500 inhabitants and over, and the total and per capita levies of taxes thereon in 1912.

The principal data of this bulletin will be consolidated later with those of other bulletins pertaining to the same general investigation and issued as the complete report on "Wealth, Debt, and Taxation."

TERMINOLOGY.

Property subject to ad valorem taxation.—This bulletin presents only such data as pertain to the assessed valuation of, and levies of taxes on property subject to ad valorem taxation. "The ad valorem tax" is used in this bulletin interchangeably with "the general property tax" as the designation of the direct tax upon real property and upon other property which is apportioned and levied by substantially the methods employed in apportioning and levying taxes upon privately owned real property.

Assessed valuations.—The assessed valuations shown in this bulletin are such valuations as are placed upon property subject to ad valorem taxation by the assessors charged with such duty. These assessors are such as are provided for in the laws of the different states. The valuations placed upon property by local assessors are usually subject to review and correction by county and state boards of equalization, the purpose of such revision being to equalize, as far as possible, the burdens of county and state taxes that are finally placed upon the local taxing districts.

Tax levies.—The tax levies shown in this bulletin are the amounts proposed to be raised by taxation of property subject to ad valorem taxes, as described in the two preceding paragraphs. They are classified by purpose under two headings: "For purposes other than schools" and "For schools;" and by civil division levying, under three headings: "State," "County," and "Other civil divisions."

Tax rates.—The rates of levy are such amounts as express the ratios between the amounts to be raised by taxation and the assessed valuations upon which the levies are based. Of themselves, they supply no exact data as to the burden of taxation. This relative burden can be shown only by introducing such corrections as are necessary to allow for the great variations in the bases of assessment that prevail in the several states. These bases vary from perhaps 25 per cent to 100 per cent of actual values.

Classification of property for assessment.—There is a general agreement in regard to the classification of the greater part of the property assessed for taxation. Certain classes of property are, however, treated differently in the different states. The operative property of railway, telegraph, telephone, express, and private car companies, and of a few other corporations of kindred character are in some states classed as real property, in others as personal property, while in other states they are given a separate classification.

The constitutional and statutory provisions for the classification of property for the purposes of assessment are set forth in detail, for the several states, in a bulletin issued by the Bureau of the Census on October 15, 1914, under the title "Taxation and Revenue Systems of State and Local Governments: 1912."

The brief statements, by states, in the text for Tables 7 and 8 give a summary of the different classes of property and their valuations, so far as it was possible to secure such segregation.

The three classes of property shown in the tables of this bulletin are briefly described in the paragraphs which follow.

Real property and improvements.—Under the heading "Real property and improvements" are tabulated the valuations of all lands and lots and the improvements thereon, except such as belong to public service corporations and are given a separate classification by constitutional or statutory provision; and except buildings and other improvements belonging to others than the owners of the lands or lots on which they are located, which in some states are classed as personal property.

Personal property.—Under the heading "Personal property" are tabulated the valuations of such tangible property as is not attached to real property, and is not given a separate classification by the laws of the state, together with such intangible property as is classed as personal property by the laws of the different states.

Other property.—Under the heading "Other property" are tabulated the valuations of properties that, by constitutional or statutory provisions, are given a status different from that accorded to the greater part of the real and personal property. These properties, where given a separate classification, are those employed in the operation of public service enterprises, such as are conducted by railway, telegraph, telephone, express, and private car companies, and kindred corporations.

DESCRIPTION OF GENERAL TABLES.

Number and character of general tables.—Tables 1 to 9 of this bulletin present such data as were secured for 1912 pertaining to the assessed valuation of property subject to ad valorem taxation, and rates and levies of ad valorem taxes, in the different states and counties of the United States and the District of Columbia, together with similar data reported for former census years.

TABLE 1.

Assessed valuations.—Table 1 presents, by geographic divisions and states, the assessed valuation of all property subject to the general property or ad valorem tax for the census years 1860 to 1912, inclusive. For 1870 two columns are presented, one showing the currency values reported at that time by local authorities and the other showing the gold equivalents of these reported values. In that year the premium on gold was approximately 25 per cent. The figures in the column headed "Gold basis" are therefore 80 per cent of those in the column next preceding, and are fairly comparable with those presented for the other years.

In 1870 the assessed valuation on the gold basis was less than in 1860 by $678,953,531. This decrease was the resultant of the growth and shrinkage in such valuations during the 10-year period.

While the figures of the table show in a general way the increase of values in the United States, they do not afford a basis for measuring the growth of national wealth. As component parts of this basis they must be supplemented by the provisions of the revenue laws in force in the several states at the different census periods; and their complete significance can be brought out only by associating them with such laws and with the practice in each state with reference thereto. The Bureau of the Census issued, on October 15, 1914, a digest of the tax laws of all states under the title "Taxation and Revenue Systems of State and Local Governments: 1912."

In 1912 the assessed valuation of all taxable property in the United States was $69,452,936,104, an amount almost double that reported in 1902. From 1890 to 1902 the increase in assessed valuation was less than 40 per cent; from 1880 to 1890 it was less than 50 per cent; from 1870 to 1880 (using the figures as represented on a gold basis) it was a trifle more than 50 per cent; and from 1860 to 1870 there was an actual decrease of more than 5 per cent. This decrease, while most pronounced in the Southern states, was shared by many of the Northern states, notably New Hampshire, Vermont, and Connecticut in the New England division. New Mexico was the only one of the Western states to show a decrease during this period.

The increase from 1902 to 1912 was general throughout the country, no state having reported a reduction, and in most states the increase was in excess of 75 per cent. With the exception of Oklahoma, which was admitted to statehood during the period, Kansas reported the largest per cent of increase, 656.4, with an actual increase of $2,383,736,661. Oregon reported the next largest per cent of increase, 511.1, with an actual increase of $756,912,077. The largest amount of increase, $5,161,865,981, though less than 100 per cent, was reported by New York, followed by Ohio with an increase of $4,490,173,770, or 225.5 per cent. West Virginia reported an increase of $912,524,489, or 357.2 per cent; and Washington, an increase of $744,146,113, or 285.2 per cent. Oklahoma reported an increase in excess of 1,200 per cent, but this is accounted for by the comparatively small assessed valuation in 1902, when the amount reported was only $88,885,986.

In addition to the states specially mentioned, those following increased the amount of the assessed valuation in excess of 100 per cent: New Hampshire, New Jersey, Illinois, North Dakota, Nebraska, North Carolina, Florida, Texas, Idaho, Wyoming, Arizona, Nevada, and California.

There are many considerations which may be advanced in explanation of the sudden and unprecedented increase in the amount of the assessed valuation, the principal one being, undoubtedly, the actual increase in the value of real property throughout the country, the value of farm land alone having increased 118.1 per cent from 1900 to 1910, while the value of all farm property, including buildings, implements and machinery, and domestic animals, but not including the value of crops, increased 100.5 per cent during the same period. It is a safe assumption that the value of other property has increased at approximately the same or even a greater rate during this period, the smaller increase in the assessed valuation being accounted for by the fact that in only a part of the states is property assessed at the full value. In some states, notably Ohio, the increase is due in a large measure to a change in the basis of assessment from about one-third the actual value, to the actual cash or sale value of such property. There is a growing tendency among the states to make the assessment upon the true cash value, or sale value, as it is more commonly called, which, while materially increasing the assessed valuation, would reduce the rate of taxation in a corresponding proportion.

For the majority of the states the data presented in Table 1 were taken from state reports. These reports generally have been prepared by, or under the supervision of, a tax commission, and no doubt represent the results of careful and accurate studies of local values. In a few instances, where state reports were not printed, or where they are issued at such infrequent intervals as to make the last-issued report undesirable for use in the preparation of this bulletin, the data were obtained through special agents of the bureau or by correspondence.

TABLE 2.

Assessed valuation of real property and improvements.—Table 2 presents, by geographic divisions and states, the valuation of real property and improvements as assessed for ad valorem taxation. It gives that portion of the valuation included in Table 1 which represents the assessment of land and the improvements thereon for the various census years from 1860 to 1912, inclusive. A comparison of the data contained in Tables 1 and 2 discloses the fact that the assessed valuations of real estate form widely varying percentages of the total assessed valuations in the different census years. These variations are due more largely to different methods of assessing personal property and of classifying railroad property than to differences in practice in assessing real property. The following statement shows for the United States in the different census years, the percentages which the assessed valuation of real property constituted of the assessed valuation of all property:

1860	57.7	1890	74.4
1870	69.9	1902	74.7
1880	76.0	1912	74.4

The corresponding percentages for the individual states present many striking contrasts.

The assessed valuation of the real property and improvements in the United States in 1912 was $51,854,009,436, an increase of $25,438,708,692, or 96.3 per cent over that of 1902. The increase was 39 per cent during the period 1890 to 1902, 45.5 per cent from 1880 to 1890, 63.5 per cent from 1870 to 1880, and 14.3 per cent from 1860 to 1870. No separation of real and personal property was made in the census of 1850. The small percentage of increase in the first two decades, from 1860 to 1880, was due to the devastation caused by the Civil War and the depression that followed. From 1880 to 1902 the increase may be considered as a normal one, there having been no considerable disturbance of the economic balance during this time. The most notable feature of the period was the development of the Western and Northwestern states, although every section of the country showed a very material increase during this period.

The period 1902 to 1912 was one of unusual development in all parts of the country and in all branches of industry, and, aside from the slight depression of 1907, was one of continued and uninterrupted growth. This growth was reflected more quickly in the increase of the value of personal property, but for the entire period the increase in the assessed valuation of personalty was 97.2 per cent, or only slightly in excess of that of realty.

The statement which follows shows, by geographic divisions and states, the per cent of increase from 1902 to 1912 in the assessed valuation of all property and of real property and improvements.

The data for the assessed valuation of real property are well supported by the report on Agriculture of the Thirteenth Census taken in 1910, in which it is shown that the value of farm lands alone increased 118.1 per cent. Taken as a whole, the data presented in this table indicate a marvelous growth in value, as remarkable for the continued increase as for the enormous value shown for 1912. The assessed valuation of real property and improvements shown for the year 1912, as compared with that reported in 1902, shows an increase in the most important element of the wealth of the Nation which is unprecedented. Reference to the table will show that the increase during this period is more than 30 per cent in excess of the increase for the entire period from 1860 to 1902, and also that the increase has not been confined to any particular section of the country, every state and every section sharing the increase on a comparatively equal basis. While the more recently settled sections show the largest per-

centage of increase, the largest amounts of increase were mainly in the older sections of the country.

GEOGRAPHIC DIVISION AND STATE.	PER CENT OF INCREASE, 1902 TO 1912, IN ASSESSED VALUATION OF— All property.	Real property and improvements.
Total	96.5	96.3

PACIFIC	184.3	179.6
Washington	285.2	268.2
Oregon	511.1	553.1
California	126.4	122.0

The greatest increase from 1902 to 1912 in the assessed valuation of real property and improvements was reported by the West South Central division, where it was 190.9 per cent. The Pacific division, with an increase of 179.6 per cent, was second in this respect. For the other geographic divisions the increases were as follows: West North Central, 123.6 per cent; South Atlantic, 107.9 per cent; Mountain, 104.4 per cent; Middle Atlantic, 92.6 per cent; East North Central, 99.4 per cent; East South Central, 52.6 per cent; and New England, 36.6 per cent.

New York reported the largest amount of increase shown for any individual state, $5,386,526,306, this increase being greater than the entire assessed valuation of real property and improvements in that state in 1902. Ohio reported the second largest increase from 1902 to 1912, $2,939,485,050, or more than 200 per cent. A large portion of the increase in Ohio was the result of a readjustment of the assessment system, bringing the assessment up from about one-third actual value to full actual or sale value. This was done in 1910. Pennsylvania, New Jersey, California, and Kansas show net increases of more than $1,000,000,000 each.

TABLE 3.

Per capita assessed valuation.—Table 3 presents, for the various geographic divisions and states, per capita averages for the assessed valuations given in Tables 1 and 2. The significance of these averages is as limited as that of the figures of the two preceding tables. They furnish no adequate measure of the relative average wealth of individuals in the different states, but when studied in connection with Tables 1 and 2 they explain to a certain extent the reasons for the great variation in the nominal tax rates of the different communities.

The per capita figures for 1912 were computed by using for the different states the population estimated as of July 1, 1913, with the exception of Kansas, in which case the population used is the result of a state enumeration made as of March 15, 1913.

TABLE 4.

Levies of ad valorem taxes.—Table 4 presents a summary of the general property or ad valorem taxes levied in the several census years from 1860 to 1912. The levies for 1870 are given in both currency and gold values, as are the valuations and per capita averages given in Tables 1, 2, and 3. The tax levies presented in Table 4 furnish information much more definite than that supplied by the tables relating to assessed valuations. These levies measure definitely the amounts which the people were called upon to contribute to the support of the state and local governments in the form of general property taxes. They do not, however, measure the relative contributions demanded of the people for the support of these governments at the different census years. Many changes have been made in the classification of properties for taxation whereby certain corporations are taxed on their earnings instead of on the valuation of their tangible property. Such taxes, as a rule, rest finally upon those to whom the corporation supplies commodities or services, and constitute a tax burden as real as that

imposed by the general property tax, although the amount resting upon an individual is not susceptible of exact calculation, and is usually paid without being recognized as a tax. Furthermore, there are special property taxes, business taxes, licenses, fees, and other classes of revenue, which in the different years have been substituted in varying degrees for the general property or ad valorem taxes, and which to a greater or less extent are finally borne by others than those from whom their payment is exacted.

The total ad valorem taxes levied in the United States in 1912 amounted to $1,349,841,038, an increase of 86.3 per cent over the levy of 1902. In 1902 the total levy showed an increase of 53.8 per cent over that of 1890; that of 1890, an increase of 50.2 per cent over that of 1880; that of 1880, an increase of 38.8 per cent over that of 1870; while the levy of 1870 was 140.1 per cent greater than that of 1860. With the exception of the last-named period the per cent of increase in the taxes levied was a gradual one up to the period 1902 to 1912, when the increase was 86.4 per cent.

From 1902 to 1912 many of the states showed an increase in the amount of taxes levied of more than 100 per cent. Nor was this increase confined to any section of the country, Vermont, Connecticut, New Jersey, Michigan, Minnesota, North and South Dakota, Nebraska, Virginia, North Carolina, Georgia, Florida, Alabama, Mississippi, Arkansas, Oklahoma, Texas, all of the Mountain division except Colorado, and all of the states of the Pacific division falling in this class. The largest per cent of increase, 483.5, was reported by Oklahoma, and the smallest, 31.1, by Maine.

The larger per cents of increase are shown generally for those states west of the Mississippi River, but the larger amounts of increase are confined to those states east of the Mississippi. Approximately two-thirds of the total increase for the United States was reported by the New England, Middle Atlantic, and East and West North Central divisions, including 21 of the 48 states. The only decreases in the amount of taxes levied are shown for Vermont and Nevada in 1902; Maine and Nevada in 1890; and South Carolina, Tennessee, Alabama, Mississippi, Arkansas, and Louisiana, in 1880.

TABLE 5.

Per capita levies of ad valorem taxes.—Table 5 gives for the different census years the per capita averages of the tax levies shown in Table 4. These tax levies, both total and per capita, should be studied in connection with the revenue laws in force in the years for which the figures are given, for the reasons pointed out in the text for Table 4.

The per capita levy of ad valorem taxes was $13.91 in 1912, as compared with $9.22 in 1902, an increase of 50.9 per cent for the period. From 1890 to 1902 the increase was $1.69, or 22.4 per cent; from 1880 to 1890 the increase was 20.3 per cent; from 1870 to 1880 the increase was 6.6 per cent; and from 1860 to 1870 the increase was 95.7 per cent; using for comparison the levy on the gold basis for 1870.

Colorado was the only state to show a reduction from 1902 to 1912 in the per capita levy, the reduction amounting to 17 cents, or 0.9 per cent. For the period 1890 to 1902, 11 states reported a reduction in the per capita levy; for the period 1880 to 1890, only 3 states reported such reduction; for the period 1870 to 1880, a reduction was reported by 19 states; and for the period 1860 to 1870, only Utah reported a reduction. These reductions were in all cases due primarily to a greater rate of increase in the population than in the assessed valuation and did not represent any decrease in the amount of taxes levied; as, for instance, in the case of Utah, just mentioned, the assessed valuation more than doubled during the period from 1860 to 1870, but the population increased at a slightly higher rate.

The highest per capita levy in 1912 was reported by Montana and amounted to $26.83. Nevada with $24.02 was next highest, followed in order by California, $23.50; Massachusetts, $23.27; Washington, $23.21; Oregon, $22.64; and New York, $22.80. These were the only states reporting a per capita levy in excess of $20. The smallest per capita levy, $4.33, was reported by North Carolina. This amount was only slightly exceeded by South Carolina, which reported a per capita levy of $4.39, and Alabama, which reported a per capita levy of $4.45. These 3 states were the only ones to report a per capita levy of less than $5. Twenty-one of the 48 states reported a per capita levy below the average for the United States, the majority of such states being in the South Atlantic, East South Central, and West South Central divisions. In the East North Central and the Pacific divisions every state reported a per capita levy in excess of the average for the United States.

Average tax rates.—The average tax rates given in Table 5 are the nominal rates, which represent the relation between tax levies shown in Table 4 and the assessed valuations shown in Table 1. Their variations bring out prominently the difference in the general trend of classification of properties and methods of assessment in the different states, and the different ratios in those states between the assessed valuation and the true value of the various classes of property subject to the general property tax.

That section of Table 5 which shows the average tax rate per $100 of assessed valuation is of unusual interest and presents some significant figures, the most surprising of which is that the average rate per $100 was less in 1912 than in 1902, the figures being $1.94 and and $2.05, respectively. Beginning with $0.78 in 1860 the rate advanced to $1.98 in 1870, receded to $1.83 in 1880, advanced again to $1.85 in 1890, to $2.05,

the highest recorded, in 1902, and receded again to $1.94 in 1912.

While 17 of the 48 states reported reduction from 1902 to 1912 in the rate per $100, the reductions of the average rate for the United States is undoubtedly due to the reduction in those states which in recent years have made material changes in the method of arriving at the assessed valuation of all property. In Ohio such changes reduced the rate of levy from $2.38 to $1.18, or 50.4 per cent. In Oregon the reduction was from $3.32 to $1.89, or 43.1 per cent. The reduction in Kansas was from $4.09 to $1.02, or 75.1 per cent. The states enumerated are those in which the most pronounced reduction occurred, and each of these has revised its basis of assessment since 1902.

Minor reductions occurred in several states, but these, as a rule, were due to actual, although abnormal, increases in the value of taxable property. Several states have recently adopted the plan of raising revenue for state purposes solely from license fees and taxes on corporate bodies rather than from the general property tax, and this, too, has had its effect in the general reduction of the ad valorem property tax. Among the states using this plan are California, Connecticut, Delaware, and New Jersey. New York, Ohio, Pennsylvania, and Wisconsin each depends largely for state revenues on taxes other than the general property tax. Massachusetts, Rhode Island, Illinois, and several other states depend largely upon the receipts from corporation taxes and license fees. In some of the states the only tax to which certain classes of corporate bodies are subject is collected by the state for state purposes. All of these plans, while in no way reducing the amount of taxes collected, tend to relieve the burden borne by the general property within the state, resulting in a reduction of rate of levy on this class of property.

Table 6.

Assessed valuation of property subject to ad valorem taxation.—Table 6 presents for the years 1912, 1902, and 1890 the total and per capita valuations of all property as assessed for ad valorem taxation in each of the counties of the several states, the state totals and per capita averages being the same as presented for those years in Tables 1 and 3, respectively.

Levies of ad valorem taxes.—This table presents, also, for the years 1912, 1902, and 1890 the total and per capita levies of ad valorem taxes in each of the counties of the several states, the state totals and per capita levies being the same as those presented in Tables 4 and 5, respectively.

Tables 7 and 8.

Assessed valuations, by classes of property.—Table 7 shows the assessed valuation in 1912 of all property subject to ad valorem taxation, and the ad valorem taxes levied by specified civil divisions for schools and for general purposes, by states and by grand divisions; while Table 8 shows the same classes of data by counties. That section of the table which shows the assessed valuation is further divided to show the three principal classes of property: Real property and improvements, personal property, and other property.

The first of these divisions is subject to very little change and represents practically the same class of property in all states. The total valuation and the valuation of real property and improvements shown in Table 7 are the same as those presented in Tables 1 and 2, respectively, for the year 1912.

"Personal property," as shown in this table, represents the value of personal property according to the classification adopted by the state reporting it, and is subject to considerable variation in the different states. In those states where no data are shown under the heading "Other property" personal property includes the value of all property except real property and improvements, and such operative properties of railroads, express companies, telephone companies, and other public utility corporations as are classed as real property.

The column headed "Other property" includes the value of all assessed property within the state not classed as real or personal and to some extent is a classification adopted by this bureau. The operative property of railway, telegraph, telephone, express, private car, and other transportation and transmission companies, which is not subject to other classification, constitutes the principal class of properties the valuations of which go to make up the amounts shown in this column. As stated above, in those states where no data appear in this column the valuation of the property commonly shown here is included with that of personal property, in order to follow the state classification, or, in some cases, because no segregation was possible. The classes of property distributed under the three headings are specified in the brief statements of methods of assessment and citations to financial reports of state officials which are presented below by states.

Comparison of the assessed valuations of the real property and improvements for the different years has been made in the text for Tables 1 and 2, but for the reasons stated above there can be no similar comparison of either personal or other property that would be satisfactory. The totals shown may, however, be compared with those shown for other years. By comparing the figures shown in Table 7 with those presented in the report on Wealth, Debt, and Taxation for 1902, the assessed valuation of personal property shows an increase of $4,679,062,428, or 62.8 per cent, a rate of increase slightly less than two-thirds of that shown for real property and improvements. The assessed valuation of other property in 1912 shows an increase of $3,774,917,048, or 257.5 per cent. This increase is accounted for in a measure by the fact that

while in 1902 only 29 states reported property in this class, there were 34 states reporting such property in 1912. Some of the states showing property in this classification in 1902 did not show such property in 1912, notably Pennsylvania, Indiana, and North Dakota. These changes were due to changes in the state classification, which, as stated above, were accepted by this bureau.

Levies of ad valorem taxes, by the different civil divisions.—The total taxes levied as shown in Table 7 are the same as shown in Table 4 for 1912. The levies presented in Tables 7 and 8 are classified primarily under two headings: "For purposes other than schools" and "For schools." Under each of these headings are given the amounts levied by the state, counties, and other civil divisions, the last-mentioned class including the independent school districts. The principles upon which these levies were made and the various levies which have been assembled in the different columns are discoverable from the revenue laws and from the reports of the finance officers cited below. The figures presented as the total in this section of the table have been discussed in the text for Table 4.

Two states—Connecticut and Delaware—and the District of Columbia reported no levies for state purposes. The other states reported amounts varying from $9,562,995, reported by Michigan, to $102,338, reported by Vermont. In comparing the amounts levied by the different states it should be remembered that the levies here shown are those made upon such property as may be subject to an ad valorem tax. Many states, as before mentioned, are drifting away from the general property tax, and are depending upon corporation, inheritance, and income taxes, and upon licenses and fees derived from sources not generally furnishing revenue for the minor civil divisions of the state. This separation has already been accomplished in Connecticut and Delaware, and to a considerable extent in New Jersey, Ohio, West Virginia, Oregon, and California.

The levies of ad valorem taxes by counties for purposes other than schools amounted to $257,115,032 in 1912, an increase of $119,600,758, or 87 per cent, over the levy of 1902. Rhode Island was the only state in which county levies were not reported. In each state the county levy showed a material increase over the amount reported in 1902, and in numerous cases the increase was in excess of 100 per cent.

Under the heading "Other civil divisions" are included all levies made upon property by civil divisions other than the state and county for purposes other than schools. There is considerable variance in the powers and authority of these divisions in the different states. The cities, towns, and villages throughout the respective states usually are granted about the same authority, with reference to the power to levy taxes, but for such divisions as "towns" (meaning townships), precincts, wards, and those districts incorporated under general or special acts of legislative bodies, there is no such similarity. In the New England states the "towns" rank very close to cities and villages in this particular, while in New York and Wisconsin the corresponding townships are very much more restricted in their operations. In Indiana, Ohio, and Michigan, the townships form a very important unit in the general scheme of government and levy a considerable portion of the taxes of the different divisions of the state, while in Arkansas they make no levies. In a majority of the states the cities, towns, and villages reported the largest part of the levies shown in this column. The total reported by these divisions in 1912 was $584,627,040, an increase of $256,674,171, or 78.3 per cent, over the amount reported in 1902.

The amount of taxes levied for school purposes is shown in the last section of this table, which gives the amounts levied by states, counties, and other civil divisions. The last class includes the independent school districts in those states where this class of division exists. The total levy for school purposes amounted to $386,980,972, an increase of $179,259,522, or 86.3 per cent. Of the total levy reported, $44,469,575, or 11.5 per cent, was levied by the state; $31,817,172, or 8.2 per cent, by the counties; and $310,694,225, or 80.3 per cent, by other civil divisions. In 1902 the states levied a school tax of $28,853,946, or 13.9 per cent of the total, and all other civil divisions levied a school tax of $178,867,504, or 86.1 per cent. No separation was made of the taxes levied by counties and other civil divisions in 1902. Thirty-six states reported a school levy in 1902, while only 31 states reported such levies in 1912. The states that reported a school levy in 1902 but did not do so in 1912 are Rhode Island, New York, West Virginia, Georgia, and California. In each of these states, however, there was a considerable sum appropriated for schools, but this money was secured from sources other than the general property tax.

The following sections, by states, give the methods of assessment, and the sources from which the data shown in Tables 7 and 8 were derived, with such analyses of the amounts of the three classes of property as have been possible.

ALABAMA.

The assessed valuations were taken from the report of the state auditor, 1912, and, so far as real estate and personal property locally assessed are concerned, refer to the assessment made between October 1 and February 1, with a supplementary assessment up to the first Monday in May. The tangible property of railroad, telegraph, and long-distance telephone companies is assessed by the state board of assessors, while the franchise or intangible property of railroad, street railway, telegraph, telephone, and other companies operating public utilities is assessed by the state tax commission.

The state levy for purposes other than schools was obtained by applying to the assessed valuation the state rate of 35 mills for such purposes, while the state levy for schools was computed by using the rate of 30 mills levied by the state for that purpose. The county levies were computed by using the total assessed valuations for the counties as reported by the state auditor, and the rates of levy given for the various counties in the report of the state tax commission for 1912, while the amounts levied for school purposes were secured by the agents of the bureau.

In the column headed "Other civil divisions" of Tables 7 and 8 is presented the amount of levies by cities and villages, the only taxing authorities in Alabama aside from the state and counties.

No details of the assessed valuation were given in the auditor's report for 1912. In 1911, when the total valuation was $539,904,116, real estate consisted of lands valued at $165,898,993, and town property, $152,048,581; while personal property consisted of live stock valued at $24,691,856; goods, wares, and merchandise, $20,318,502; money on hand or deposit, solvent credits, etc., $4,980,670; shares of incorporated banks and corporations of all kinds, $19,751,780; roadbeds, tracks, rolling stock, and other property of railroads, canals, etc., $79,697,358; telephone and telegraph companies, $5,889,740; property of water companies, $14,684,767; value of franchises, $24,987,663; 10 per cent penalty for nonassessment, etc., $1,030,725; and all other, $25,923,481.

ARIZONA.

In Arizona all property except the operative property of railway, telegraph, telephone, express, and sleeping car companies, and private car lines, which is assessed by the state board of equalization, is assessed annually by the county assessors as of the first Monday in February.

The assessed valuations presented in Tables 7 and 8, as well as the amounts of levies made by the state government, were taken from the report of the state board of equalization for the year 1912. An exact distribution of the property subject to ad valorem taxation into real, personal, and other, was not possible, because exemptions on account of the property of widows could not be segregated into real and personal property. The entire amount of these exemptions, as shown by the report of the state board of equalization, was deducted from the valuation of real property in ascertaining the amounts to be entered in Tables 7 and 8. Doubtless a small portion of these exemptions consisted of personal property and should therefore have been deducted from the valuation of property of that class. The exemptions did not, however, include any public utility property assessed by the state board of equalization.

The state levy is exclusive of the levy imposed by the state board of equalization against the local taxing authorities to pay the principal and interest on local debt assumed by the state. Such taxes are treated as local levies.

Civil divisions, other than the state and counties, reporting levies for purposes other than schools were the cities and villages. While local school districts have power to levy taxes in addition to those levied by the state and county for school purposes, no levies by them were reported in 1912.

Real estate consisted of land and improvements valued at $18,173,331; mines, mill sites, and improvements, $42,570,082; and town and city lots and improvements, $25,871,076. The sum of these amounts exceeds by $2,286,444 the state totals shown in Tables 7 and 8, which is due to the fact that the amount includes the exemptions which can not be distributed among the various classes of property.

Personal property consisted of live stock valued at $9,330,579; stocks of merchandise, $4,506,035; bank property, $2,883,820; and all other, $7,351,472.

"Other property" consisted of railways, including street railways, $28,657,711; and other property assessed by the state board of equalization, $3,280,529.

ARKANSAS.

With the exception of the operative property of railroad, telegraph, telephone, express, and other public utility companies, assessed by the state tax commission, all property is locally assessed. The local assessment refers to the first day of February, and is made biennially in the odd-numbered years.

The assessed valuations shown in Tables 7 and 8 were taken from an abstract of the tax books of 1912, furnished by the state tax commission.

The total rate of levy for state purposes in 1912 was 6.75 mills, of which 2.7 mills was for schools and 4.05 mills was for other purposes. The amounts levied by the state were obtained by applying these rates to the total assessed valuation, while the county levies, which included the levies for roads, and also those of the local school districts, were obtained by agents of the Bureau of the Census.

Civil divisions, other than the state and counties, levying taxes for purposes other than schools were cities, villages, and towns, while the other civil divisions levying taxes for schools included the municipalities and the local school districts.

In this state all property assessed is classified by the statutes and by local practice as real or personal property. In the columns headed "Real estate and improvements" and "Personal property" are included the valuations of railroad, telegraph, and telephone property, etc., classes of property which in most states are given a separate classification, and shown in Tables 7 and 8 in the column headed "Other property."

Real estate consisted of land and improvements valued at $141,195,270; town lots and improvements, $88,121,502; and railroad tracks, $69,512,128.

Personal property consisted of live stock valued at $34,106,552; goods and merchandise, $17,455,939; moneys and credits, banking property, etc., $25,401,950; material and manufactured articles, $8,206,461; personal property of railroad, telegraph, telephone, express, gas, and pipe-line companies, $13,987,809; and all other personal property, $29,485,497.

CALIFORNIA.

In 1910 radical changes were made in the methods of raising revenue for the state and local governments in California. The operative property of all public service corporations, including that of railroad, telegraph, and car companies, etc., and banking and insurance companies, was withdrawn from local taxation except for the purpose of paying indebtedness existing prior to November 8, 1910, and was made subject to a tax by the state government based on gross earnings. In Tables 7 and 8 the total value of this property, amounting to $444,723,043, is shown in the column headed "Other property." The valuations shown in the column headed "Real property and improvements" and "Personal property" are the values subject to county taxation. The only ad valorem tax levied by the state in 1912 was in aid of the Panama-Pacific Exposition, and aggregated $1,219,894.

The assessed valuations and tax levies shown in Tables 7 and 8 were taken from the report of the state board of equalization, while the data given for the cities of over 2,500, appearing in Table 9, were secured by agents of the bureau.

Levies made by other civil divisions for purposes other than schools are those made by cities, villages, road districts, reclamation districts, and other special districts, while the amounts entered as levies by other civil divisions for schools consist of the levies for common schools and special high schools, made by the local school districts.

Included in the valuations of real property and improvements are those of town and city lots, $899,789,208; improvements on town and city lots, $474,347,121; real estate other than town and city lots, $671,542,796, and improvements on same, $117,341,078.

No details of personal property were shown by the report.

Included in the column headed "Other property" is the operative property of railroads and other public service corporations, including both that assessed locally and that assessed by the state board of equalization.

COLORADO.

With the exception of the operative property of railway, telegraph, telephone, express, and car companies, the assessment of which is made by the state tax commission, all property is annually assessed by the county assessors as of the 1st day of April.

The assessed valuations and the amounts of taxes levied by the state and minor civil divisions, as shown in Tables 7, 8, and 9, were taken from the report of the state tax commission for the year 1913. The total assessed valuation for 1912 was $422,330,199. Under the supervision of the tax commission created in 1911, radical changes were made in the method of assessment, which resulted in increasing the total assessment from $422,330,199 in 1912, to $1,306,536,692 in 1913.

Civil divisions, other than the state and counties, reporting levies for purposes other than schools, were cities and villages, while the corresponding divisions reporting levies for schools were the local school districts.

Real estate consisted of town and city lots valued at $85,633,260; improvements thereon, $83,346,468; irrigated land, $32,355,224; grazing land, $21,121,657; dry-farming land, $10,147,170; improvements on agricultural land, $16,886,887; metalliferous mining claims and improvements thereon, $11,322,850; and all other, $19,953,182.

No details were shown of the value of personal property exclusive of exemptions.

"Other property" consisted of railroads valued at $54,567,795; telegraph companies, $906,110; telephone companies, $3,872,576; and all other property assessed by the tax commission, $1,665,128.

CONNECTICUT.

In Connecticut there is an entire separation of state and local revenues. No ad valorem taxes were levied by the state in 1912, the chief source of revenue for support of the state government being special corporation taxes on railroads, street railways, express companies, and telegraph and telephone companies. The special taxes paid to the state by these companies are in lieu of all other taxes, state or local. Real estate and personal property generally are subject to local taxes by towns, cities, and boroughs. The town is the unit of assessment, which is made for the purpose of local taxation by the town assessor, and refers to the 1st day of October.

The assessed valuations shown in Tables 7 and 8 were taken from the report of the state tax commissioner for the biennial period 1911 and 1912, and represent the valuations as fixed by the state board of equalization. Included in the valuations of real estate and improvements are the returns by the towns, and the total amount added by the state board of equalization. A portion of the amount added doubtless should have been added to personal property, but no details of the changes made by the board were given.

The amount of taxes levied for schools and other purposes, except the levies made by the counties, which were secured by agents of the bureau, was computed from data in the state register and manual for the year 1913. New London and Windham Counties did not report any levies of ad valorem taxes in 1912.

Civil divisions, other than the state and counties, reporting levies for purposes other than schools, were cities, towns, and boroughs, while the corresponding divisions reporting levies for schools were the local school districts.

No segregation can be shown of the equalized assessment. The unequalized valuation of real estate as returned by the local assessors, $786,463,081, consisted of dwelling houses valued at $502,603,898; land, $94,197,604; stores, $102,865,065; and mills, manufactories, and distilleries, $86,796,514. Personal property returned by the local assessors, amounting to $161,935,938, was distributed as follows: Live stock, $9,255,542; stocks, bonds, etc., $4,228,726; investments in merchandise and mechanical operations $116,204,352; investments in steamboats, vessels, and commerce, $2,717,977; jewelry, musical instruments, furniture, etc., $4,964,475; wagons, automobiles, and bicycles, $9,515,444; and all other personal property, $15,049,422.

DELAWARE.

In Delaware the revenues for the support of the state government are derived from corporation and inheritance taxes, and from fees and licenses on various occupations, no ad valorem taxes being levied. Other civil divisions of the state rely mainly on the general property tax. For purposes of local taxation, with the exception of the city of Wilmington, where an annual assessment is provided for, property is assessed once in every four years, the last assessment having been made in 1909.

The operative property of railroads, telegraph, telephone, canal, express, and other public utility companies is not subject to ad valorem taxation, the taxes imposed on such corporations being in the form of a tax based on the net earnings or on the number of miles of track or wire. Railway companies are allowed to commute all taxes by the payment of a specified amount.

The assessed valuations and tax levies shown in Tables 7 and 8 were secured by agents of the bureau.

The levies shown by other civil divisions for purposes other than schools were those made by the cities and villages, while the corresponding levies for schools were the levies made by cities, villages, and school districts.

No details were secured as to the valuations of real and personal property shown in Tables 7 and 8.

DISTRICT OF COLUMBIA.

For governmental purposes, the District of Columbia is identical with the city of Washington, and the figures presented in Tables 7 and 8 for that city represent all the assessed valuations within the District.

The assessment of real property in 1912 gave land a valuation of $169,648,481; improvements thereon, $160,674,006; and personal property, $29,609,766.

FLORIDA.

The assessed valuations as well as the amount of taxes levied by the state, road districts, and the special school districts, appearing in Tables 7 and 8, were taken from the report of the state comptroller for 1912. The amount of levies by counties for schools and other purposes and the levies by cities and villages were secured by agents of the bureau.

With the exception of the operative property of railroad, telegraph, sleeping car, and parlor car companies assessed by a board composed of the state comptroller, the attorney general, and treasurer, property is assessed by county assessors, the assessment referring to the 1st day of January, and the roll being made up between that date and the 1st day of July. State, county, and school district taxes are levied on the assessments thus made. Cities, however, make their own assessments and levy city taxes thereon. The difference between the assessment roll upon which city taxes are levied and the valuation upon which taxes are levied by other civil divisions, is sometimes considerable, as is evidenced by the fact that the total assessed valuation of Duval County, as shown in Table 8, is $25,252,101, while the assessed valuation of the city of Jacksonville, located in this county, as shown in Table 9, is $55,834,360.

The levies of the "state drainage tax" are omitted from Tables 7 and 8. These are special assessments paid by the property owners in proportion to the benefits derived.

Civil divisions, other than the state and counties, reporting levies for purposes other than schools, are cities, villages, and townships, while the amounts reported in the corresponding column for schools represent the levies by local school districts.

Real estate consisted of land and improvements, valued at $79,525,041, and town and city lots and improvements, $60,675,514. The valuation of personal property is not shown in detail. Of the total assessed valuation of personal property, $7,422,449 represents the value of live stock. The valuation of "other property" consisted of that of railroads, $33,515,691; telegraph lines, $516,302; and Pullman cars, $247,211.

GEORGIA.

With the exception of the operative property of public service corporations, which is assessed by the comptroller general, all property in Georgia is assessed by local assessors. The assessment by the comptroller general refers to the 1st day of January, while the date of the local assessment is some date between January 1 and April 1, as fixed by the governor, comptroller general, and state treasurer.

The assessed valuations, as well as the amounts of taxes levied by the state, were taken from the report of the state auditor for the year 1912. The state levy in 1912 was 5 mills, and the entire amount of the levy is shown as being for purposes other than schools.

This is due to the fact that the state, though it makes annual appropriations for school maintenance, does not make a specific levy for that purpose.

Civil divisions, other than the state and counties, reporting levies for purposes other than schools, were the cities and villages, while the corresponding divisions reporting levies for schools were the local school districts, and in some instances, cities and villages. There is no uniform method of levying taxes for schools in this state. In some sections the county is the unit of administration, and all taxes are levied by the county government and applied to all the property within the county. In other sections the local districts, or cities and villages, may be the unit of administration, and these units may levy the taxes for school purposes only on the property within the corporate limits of such units.

Real estate consisted of improved lands valued at $193,197,948; wild lands, $5,954,428; and city and town property, $232,177,295.

Personal property consisted of live stock valued at $43,264,895; household and kitchen furniture, $26,232,675; plantation and mechanical tools, $10,150,799; merchandise, $41,571,526; cotton manufactories, $39,645,922; moneys, stocks, bonds, etc., $53,336,906; shares in banks, $39,233,117; and all other, $19,571,717.

"Other property" consisted of railroads valued at $102,126,418; street railways, $16,034,449; telegraph companies, $1,412,569; telephone companies, $6,791,738; express and car companies, $1,987,197; property of electric light and power companies, $3,232,263; property of gas and water companies, $3,908,208; and the property of steamboat and steamship companies, $2,528,272.

IDAHO.

With the exception of the tangible property and franchises of railway, telegraph, telephone, and car-line companies, assessed by the state board of equalization, all property is assessed locally and refers to the second Monday in January.

The assessed valuations presented and the amount of taxes levied by the state were taken from the 1912 report of the state board of equalization. The county levies were computed from data contained in this report, supplemented by reports of agents of the bureau, while the levies by cities, villages, and other civil divisions were secured by agents of the bureau or by correspondence. Included in the levy of state taxes is the predatory animal tax, amounting to $10,899, which is levied only upon the valuation of live stock.

Included in levies by other civil divisions for purposes other than schools are the levies by the municipalities and road districts, while the levies shown by other civil divisions for schools represent the levies by the independent school districts.

The total valuation of real property amounted to $107,074,284, and that of personal property to $25,457,253. The reports, however, do not classify these valuations separately by counties.

Real estate consisted of land valued at $72,211,067; improvements thereon, $6,174,736; town lots, $17,143,058; and improvements thereon, $11,545,423.

Personal property consisted of live stock valued at $8,766,142; merchandise, $5,242,673; net profits on mines, $3,377,385; bank stock, $2,863,314; and all other personal property, $5,207,739.

"Other property" consisted of the operative property of railroads, valued at $33,802,629; Pullman and private car companies, $144,770; telegraph companies, $460,982; and telephone companies, $572,239.

ILLINOIS.

With the exception of the operative property of railway companies, and the excess of the capital stock over the value of the tangible property locally assessed, of telegraph, telephone, express, and other corporations, all property in Illinois is annually assessed by the town and district assessors in counties under township organization, and by the county assessors in counties not under township organization.

The assessed valuations presented in Tables 7 and 8 are the valuations as equalized by the state board of equalization, and were taken from the report of that board for the year 1912. The state levy was computed by applying the state rate in 1912, 38 cents on the $100, to these valuations. Of the total levy, 19 cents on the $100 was for general purposes; 9 cents, for public school purposes; and 10 cents for the University of Illinois.

Included in the levies made by civil divisions other than the state and counties, for purposes other than schools, are the levies made by cities, villages, townships, and road districts. No ad valorem tax levies were reported for drainage or levee districts, these districts being maintained by special assessments based upon the assumed amount of benefit.

Reported under levies by other civil divisions for schools are the levies made by the local school districts. The data concerning all levies, except the state levy, were secured by agents of the bureau and by correspondence.

The only segregation of the valuation of real estate shown by the state report was as follows: Land and improvements, $691,756,356; town and city lots and improvements, $951,081,600; and lands and town and city lots owned by railway companies, but not used in the operation of railways, $5,662,590.

Personal property consisted of moneys and credits valued at $92,482,549; live stock, $59,473,417; bank stock, $58,883,102; merchandise, material, and manufactured articles, $49,626,063; manufacturers' and agricultural tools, implements, machinery, etc., $13,108,667; bonds and stocks, $8,405,301; household and office furniture, $17,036,842; grain, $12,536,090; and all other, $161,850,669.

"Other property" consisted of the valuation placed upon the operative property of railway companies, $194,035,709; and the corporate excess of telegraph and telephone companies, etc., $27,734,277. The valuation of operative railway property does not include that of the Illinois Central Railroad. This corporation pays to the state 7 per cent of its gross earnings in lieu of all other taxes, as is provided for by Article XIV of the state constitution.

INDIANA.

With the exception of the operative property of railway, street railway, telegraph, telephone, and other public utility companies, all property in Indiana is assessed locally; real estate once every four years, with annual adjustments to meet the changes in values, and personal property annually. The assessment refers to the 1st day of March.

The assessed valuations and the amounts of taxes levied by the state and local taxing authorities were taken from the abstract of the tax duplicate for the year 1912, as published by the auditor of state.

Civil divisions, other than the state and counties, reporting taxes for purposes other than schools, were the cities, villages, and townships, while the corresponding civil divisions reporting levies for schools were the independent school districts, the school tax representing the tuition tax and the "special" school tax.

No details are shown of the valuations of the items included in real estate and personal property. The property of public utility corporations, which is usually given a separate classification and included in Tables 7 and 8 in the column headed "Other property," has, in this instance, been reported as personal property.

IOWA.

In Iowa real estate is listed for taxation biennially in the odd-numbered years. In the even-numbered years the valuations on the assessment roll are corrected by additions and deductions on account of improvements made and losses sustained during the preceding year. Personal property is assessed annually. With the exception of the operative property of railway, telegraph, telephone, and other public utility companies, assessed by the executive council, all property is assessed by local officials.

Exempt from the general property taxes imposed by the state and local taxing authorities, are moneys and credits, which are subject to a uniform tax throughout the state of 5 mills on the dollar of actual valuation.

All data presented in Tables 7, 8, and 9 were taken from reports issued by the auditor of state for 1911–12, or from the records in the office of that official.

Included in the levies by other civil divisions for purposes other than schools are those made by the townships, cities, and villages, while the levies for schools by other civil divisions are those made by the local school districts.

Real estate consisted of land and improvements valued at $412,301,312, and town lots and improvements, $135,243,591.

Personal property consisted of moneys and credits, valued at $188,773,772; live stock, $46,506,264; merchandise, $21,752,930; bank stock and other moneyed capital, $15,658,359; and all other personal property, $9,845,076.

Included in the column "Other property" are the operative property of railroads, with a valuation of $67,434,335; telegraph and telephone property, $4,207,254; and the property of express companies, $369,704.

KANSAS.

With the exception of the property of cities of the first and second classes, which may be assessed annually, real property and improvements are assessed biennially, with annual adjustments to meet changes in values. Personal property is assessed annually, and the assessment in the case of both real and personal property refers to the 1st day of March.

In 1908 the administration of the revenue laws was placed under the control of a central authority, the state tax commission, and the basis of assessment was changed from about one-fifth to about four-fifths of the true value.

The increase in the assessed valuation of property from 1890 to 1902 was slightly over $15,000,000, while from 1902 to 1912 the increase aggregated over $2,400,000,000.

The assessed valuations and tax levies made by the state were taken from the 1912 report of the tax commission, the levy for schools was taken from the 1912 report of the superintendent of public instruction, while other levies were taken from schedules secured by agents of the bureau. For a few of the counties the levies for county high schools were not secured.

Included in the levies of other civil divisions are those made by the cities, villages, townships, and drainage districts. Levies of irrigation districts are omitted from both Table 7 and Table 8, as the revenues of these districts were derived from special assessments based upon the amount of benefit received. Under levies by other civil divisions for schools are included the levies by the local school districts.

Real property and improvements consisted of land valued at $1,228,702,127; improvements on land, $129,416,186; and city and town lots and improvements, $440,221,647.

Personal property consisted of live stock valued at $166,088,877; merchants' and manufacturers' stock, moneys, and credits, $91,459,603; money on hand and on deposit, $65,285,818; mortgages, $65,795,195; bank and corporation stock, $37,354,263; and all other personal property, $91,367,176.

"Other property" consisted of the operative property of railroads valued at $378,104,550; property of

telegraph and telephone companies, $11,512,525; gas and pipe-line companies, $29,490,798; street and interurban railway companies, $11,905,528; and express companies, $195,998.

KENTUCKY.

With the exception of railroad property, assessed by the state railroad commission, and the intangible (franchise) property of corporations, assessed by the state board of valuations and assessment, property is assessed for taxation by local officials, the assessment referring to the 1st day of September. The assessed valuations given in Tables 7 and 8, in so far as the property locally assessed is concerned, were taken from the report of the state board of equalization, 1912, while the valuation of the operative property of railroads and the franchise valuations were secured from the office of the state auditor.

The assessed valuations shown for cities of over 2,500 inhabitants in Table 9 represent the local assessments, which may differ from the assessment of property in the cities or towns upon which the state and county taxes are levied. The valuations and levies were all taken from reports secured by agents of the bureau.

The total rate of levy by the state in 1912 was 5 mills, of which 2.6 mills was for schools and 2.4 mills, for other purposes. The amounts of the levies were obtained by applying these rates to the total assessed valuations.

The county levies for purposes other than schools were obtained by applying to the total assessed valuations the rates of taxation for general purposes for the various counties, which were secured by agents of the bureau.

The amounts shown as county levies for schools, and also as the levies by the independent school districts, are the taxes collected rather than the levy, and were taken from the 1912–13 report of the state superintendent of public instruction.

Civil divisions, other than the state and counties, levying taxes for purposes other than schools, were cities, villages, and towns, while the other civil divisions levying taxes for schools were cities, villages, towns, and local school districts.

Real estate consisted of land and improvements assessed at $350,600,236, and town lots and improvements assessed at $286,174,675.

No distribution can be made of the valuation of personal property subject to equalization, amounting to $122,034,096. Among the items included in the personal property not subject to equalization were notes secured by mortgage valued at $25,970,153; other notes, $19,430,345; and accounts, $10,621,238. The total value of property not subject to equalization was $83,234,914.

"Other property," the total valuation of which was $189,130,112, consisted of the following items: Tangible property of railroads valued at $68,103,488; railroad franchises, $53,784,140; and franchises of other corporations, $67,242,484.

LOUISIANA.

In Louisiana the property of railroads, canals, and other transportation and transmission companies is assessed by the state board of appraisers. The rolling stock or movable property of such corporations whose lines lie only partly within the state is assessed on a mileage basis, the real estate, roadbeds, roads, iron, tracks, superstructures, excavations, and channels are assessed in the parish where located; all other property is taxed in the taxing district in which the principal office of the company is located. All other classes of property are assessed by local assessors, the assessment relating to the 1st day of January.

The assessed valuations shown in Tables 7 and 8 were taken from the reports of the state auditor and the state board of appraisers for the year 1912. The amounts of the state levy for schools and for other purposes were obtained by applying to the total assessed valuation the statutory rates of 1.65 mills and 3.8 mills, respectively.

The amounts levied by parishes for schools and for other purposes were secured by agents of the Bureau of the Census.

Included in the levies made by other civil divisions for purposes other than schools are those of cities and villages and levee districts. The data for the cities and villages were secured by agents of the bureau, while the data relating to the levee districts were secured from the report of the board of state engineers for the year 1912 and by correspondence. In each of these levee districts except Orleans, where the rate was 1 mill, the rate of levy was 10 mills. In the fifth Louisiana district no levy was made in 1912, because of an unusually destructive overflow of the Mississippi River. In 1913 this district made a levy of $111,585 on an assessed valuation of $11,158,504.

The civil divisions, other than the state and counties, which levied taxes for schools were the local school districts. The data presented for these districts are from volume 2 of the report of the state superintendent of public education for the year 1912.

The valuations of the various classes of real and personal property, as given in the report of the auditor of public accounts, which differ somewhat in total amount from the data used in the table, are as follows:

Real estate, outside of the parish of Orleans, consisted of land valued at $147,269,197; city and town lots, $38,228,012; and improvements on land and lots, $24,321,655. The valuation of improvements in the parish of Orleans is not shown separately from those of land and lots. The valuation of lands, lots, and improvements in this parish was $159,484,525.

Personal property consisted of moneys, credits, stock, etc., valued at $35,173,552; merchandise, $32,958,822;

live stock, $13,794,580; franchises, etc., $9,741,521; vehicles, $4,682,884; household furniture, etc., $1,405,050; and all other, $20,986,321.

"Other property" consisted of property of transportation and transmission companies as follows: Operative railway property valued at $56,857,664; telegraph property, $1,093,259; telephone property, $3,779,637; sleeping car property, $422,129; and express property, $319,000.

MAINE.

The valuations upon which the state taxes are apportioned to the various counties and on which the county taxes are apportioned to the various towns, are fixed by the board of state assessors once in two years. The local taxing authorities raise the amounts apportioned to their taxing districts by levies upon the local valuations which are presented in Tables 7 and 8. These valuations, as well as the total amount of taxes levied, are taken from the report of the state board of assessors for the year 1912. The state levies for schools and for other purposes were taken from the report of the state treasurer for 1912, while the county levies were secured by agents of the Bureau of the Census.

Civil divisions, other than the state and counties, reporting levies for purposes other than schools, were cities and towns. The amounts levied for schools, by civil divisions other than the state, represent the levies for common schools made by the various towns and were taken from the state school report for the year 1912. They do not include appropriations made for common and secondary schools by the cities and towns.

The only segregation shown by the state report of the total value of real estate, as locally assessed, is: Land, $139,549,284; and buildings, $190,064,718. No details are shown as to the value of the different items of personal property.

Railroad, street railway, sleeping car, and other car companies, and telegraph, telephone, and express companies pay to the state what is termed an "excise" tax based on gross receipts, which is in lieu of all other taxes on their operative property for state and local purposes. The value of such operative property is not entered in the assessment roll, and therefore is not shown in Tables 7 and 8.

MARYLAND.

There is no stated interval between assessments of property in Maryland, reassessments occurring only by special act of the legislature authorizing the same. An annual adjustment of values, however, is provided for. The last general assessment was made in 1910.

While certain subjects are specifically enumerated, there is no legal definition or classification of property as real or personal for purposes of taxation, and in local practice all property except the net stock assessment of corporations is included under the general heading "Real and personal property." The assessed valuations shown in Tables 7 and 8 were taken from the report of the state tax commissioner, 1914, and are the valuations upon which the county taxes were levied. Included in this valuation is the value of railroad property subject to county but not to state ad valorem taxation. The total valuation of property subject to state taxation, as shown by the report of the state comptroller for the year ending September 30, 1912, was $979,309,976, while the amount of state taxes levied, as shown by the same report, was $2,276,896, of which amount $1,579,137 was for schools and $697,759 for other purposes.

In the column headed "Other property" of Tables 7 and 8, is shown the net stock assessment of corporations, which is arrived at by the state tax commissioner by deducting from the aggregate value of shares of stock the assessed value of the real and personal property listed for taxation by such corporations.

The county levies for schools and other purposes were computed by applying to the total valuations shown by the tax commissioner's report the rates of levy in the various counties, secured by agents of the bureau.

The amounts shown in the column headed "Other civil divisions" represent the levies by cities and villages, the only taxing authorities in Maryland aside from the state and counties. The amounts of these levies were secured by agents of the bureau and by correspondence.

MASSACHUSETTS.

While the general ad valorem tax upon real and personal property is used in Massachusetts for both state and local purposes, the state government derives a considerable portion of its revenue from other sources. A peculiar feature of the system of assessment in this state is the listing of polls and of certain incomes, with property, for purposes of ad valorem taxation. The assessment of property and the general management of ad valorem taxes are matters of local administration. The state levies, through the agency of the towns and cities, a so-called direct state tax, usually expressed in round numbers. In 1912, $6,250,000 was apportioned to be collected by the local taxing authorities for state purposes.

The assessed valuations shown in Tables 7 and 8, as well as the amounts of taxes levied by the state, county, and minor civil divisions, except the local school districts, were computed from a report compiled in the office of the tax commissioner, entitled "Aggregate of polls, property, taxes, etc., for 1912." The amount of taxes levied by local school districts, which is shown as a levy by civil divisions other than the state and counties, was computed from the report of the board of education for 1912–13.

Railway, telegraph, telephone, and other corporations are taxed under what is known as a general franchise tax, or a tax on the "corporate excess." This valuation is arrived at by deducting from the market value of the shares of capital stock the amount of real and personal property locally assessed, and certain items regarded as lying beyond the jurisdiction of the state. The rate of taxation levied upon this corporate excess is determined by the average rate of taxation paid by other property for the preceding three years. The tax is paid directly into the state treasury and a part of it is distributed to towns and cities in proportion to the number of shares of stock held by the citizens thereof. The remainder, which represents the tax on shares of stock held outside the state, is retained as state revenue. In Tables 7 and 8 are included the total assessed valuations and total taxes levied on the "corporate excess," the levies being included with those made by the state government. In Table 9 these valuations and levies are omitted entirely.

Civil divisions, other than the state and counties, reporting levies for purposes other than schools, were the cities, villages, and towns.

The only segregation shown by the state report for real estate was land valued at $1,528,249,392, and buildings, $1,688,465,068; while the only items of personal property shown separately were resident bank stock valued at $34,369,868, and other personal property, $998,615,527.

MICHIGAN.

Property subject to local taxation is assessed annually by local officials, while the property of railroad, car, express, telephone, and telegraph companies, which is subject to state taxation only, is assessed by the state board of assessors. The total valuation of the property of these companies in 1912 was $238,867,225, and the amount of taxes levied for state purposes, computed at the average rate of taxation, was $4,969,142.

Once every two years the state board of equalization equalizes the local assessment in the different counties, and upon this equalized valuation is apportioned the amount of state revenue which shall be contributed by each county. The amount when thus determined is certified to the county officials, and they are required to settle with the state for the amount. The counties, however, levy the tax upon the local valuation, which may differ materially from the equalized valuation arrived at by the state board. The rate of levy for state purposes may, therefore, vary in the different counties.

All data presented in Tables 7 and 8 were secured from the records of the state tax commission.

Civil divisions, other than the state and counties, levying taxes for purposes other than schools were cities, villages, and townships.

In the column showing levies by other civil divisions for schools are shown the permanent 1-mill levy and the special levies for this purpose by townships.

No details are shown of the assessed valuations of real and personal property. "Other property" consisted of the operative property of railroads, valued at $210,884,500; Pullman Co., $600,000; express companies, $1,575,000; car companies, $1,298,325; and telephone and telegraph companies, $24,509,400.

MINNESOTA.

There is a separation in large measure of state and local revenues in Minnesota, and while the state government still levies an ad valorem tax its chief income is derived from the gross-earnings tax on the operative property of railway, telephone, freight line, sleeping car, and express companies. The gross-earnings tax thus imposed by the state government is in lieu of all other taxes, state and local, on such property owned by these companies.

The assessment of all property subject to ad valorem taxation is made by local assessors and refers to the 1st day of May. Provision was made by a law passed in 1910 for a separate listing of moneys and credits, which were withdrawn from general ad valorem taxation, a flat rate of 3 mills on the dollar, in lieu of all other taxes, being imposed upon them. Prior to the passage of this law, moneys and credits were taxed at the same ad valorem rate as other property. In 1910 this rate averaged $2.80 per $100, and under the old law in 1910, 6,200 people reported property of this class to the value of $13,919,806, and paid the tax of 28 mills. In 1912, under the new law, 50,564 persons reported moneys and credits to the value of $135,369,314, and paid the 3-mill tax.

The assessed valuations and amounts of taxes levied by the state and local taxing authorities were taken from the report of the state auditor for 1912. Civil divisions, other than the state and county, levying taxes for purposes other than schools, were cities, villages, townships, and ditch districts, while the corresponding divisions levying taxes for schools were certain of the cities and local school districts. Drainage districts in this state are maintained by special assessments and hence made no levies of ad valorem taxes in 1912.

No details are given in the auditor's report of the value of real or personal property. Railroad companies, telegraph companies, etc., not being subject to ad valorem taxation, the valuation of their property is not shown in the assessment rolls, and is not included in the valuations shown in Tables 7 and 8.

MISSISSIPPI.

The assessed valuation of real estate and personal property is taken from the report of the state auditor, 1913, and is based on the value of real estate listed

between February 1 and July 1, of 1911, and the personal estate as listed by local assessors February 1, 1912.

The assessed valuation of the operative property of railroads, included in Tables 7 and 8 as "Other property," was computed for the year 1912 by the state railroad commissioners, and is based on schedules furnished to the commission by the company, as well as on information furnished by the county and municipal assessors. Both the assessed valuation of the franchise and the capital stock are considered in arriving at the valuation.

The amount of the state levy was obtained by applying to the total assessed valuation the state tax rate for 1912, which was 6 mills. The state, while making an appropriation for the support of schools, does not make a specific levy of ad valorem taxes for that purpose. The county levies for schools and for other purposes were obtained by applying to the total assessed valuations for the counties, taken from the auditor's report, the rates of levy for the respective purposes reported by the agents of the bureau.

Included in levies by other civil divisions for purposes other than schools, in addition to those for cities and villages, are levies made by the Yazoo-Mississippi Delta Levee District and the Mississippi Levee District, amounting to $458,754. Each of these levee districts comprises parts of several counties, but the amount of the levy made on property within each county can not be shown separately.

The levies by other civil divisions for school purposes consist of levies by cities and villages and by local school districts. This information was taken from the schedules secured by the agents of the bureau. In the case of the local school districts the amounts reported are somewhat less than the amounts levied, since, for a number of districts, it was impracticable to secure returns.

No distribution of the items constituting real property was given for the 1912 assessment. In 1913, when the total valuation was $258,359,130, real estate consisted of cultivated lands valued at $69,643,559; wild and uncultivated lands, excluding timber, $62,097,665; timber, $39,792,675; town and city lots, $32,496,068; and improvements thereon, $54,329,163.

In 1912 personal property consisted of live stock valued at $31,608,879; money employed in mercantile and manufacturing pursuits, $35,732,793; bank property, less real estate, $13,723,145; money on hand, on deposit, and loaned, $8,395,346; debts, $5,214,087; and vehicles, musical instruments, household furniture, etc., $16,670,716.

In 1912 "Other property" consisted of the operative property of railroads valued at $57,246,885; sleeping car companies, $267,167; express companies, $77,500; telegraph companies, $675,500; and telephone companies, $1,834,000.

MISSOURI.

With the exception of the operative property of steam and electric railway, telegraph, telephone, and other transportation and transmission companies, all property is assessed annually by the local assessors, and relates to the 1st day of June. The taxes levied in the year 1912 by both the state and local governments are based upon the assessment roll of 1911, and the assessed valuations shown in Tables 7 and 8 relate to this year, and represent the equalized value as shown by the biennial report of the state auditor for the years 1911 and 1912.

The amount of taxes levied by the state government was taken from the same report and consists of the "state revenue tax," "state interest tax," and "state capitol building tax," on all classes of property, including the property of merchants and manufacturers. No specific levy is made by the state for schools, although a certain per cent of all taxes collected is expended for purposes of education. The levies by the county government were taken from schedules secured by agents of the bureau. The levies by civil divisions, other than the state and counties, reported in the column headed "Other civil divisions" are those made by cities, villages, and townships. The amounts of these levies were secured by agents of the bureau and by correspondence. The levies shown by other civil divisions for schools represent the levies by local school districts and were computed from the rates of levy and assessed valuations of the school districts appearing in the 1912 report of the superintendent of public schools.

No distribution of the equalized valuation of property which is shown by the tables can be made. According to the local assessment, real estate consisted of land and improvements valued at $449,008,312; and town lots and improvements, $733,892,240. Personal property, according to the same assessment, consisted of live stock valued at $80,566,838; moneys, bonds, notes, etc., $112,533,237; merchants' and manufacturers' merchandise, raw materials, and finished products, $123,809,466; corporate companies and banks, $85,306,903; and all other, $90,565,544. To the local assessment of real estate the state board of equalization added $4,513,429, while from the local assessment of personalty the state board deducted $11,338,123.

The value of "Other property," as originally assessed by the state board of equalization, consisted of that of steam railways, $130,209,156; street and electric railways, $35,295,504; telegraphs, $2,779,270; telephones, $9,958,085; and property of bridge companies, $5,756,500. To this amount was later added by the state board $7,231,595, the details of which can not be shown.

MONTANA.

With the exception of the operative property of railways, which is assessed by the state board of

equalization, the assessment of all property for state, county, and municipal purposes is made by the county assessors annually and refers to the first Monday in March. The assessed valuations shown in Tables 7 and 8 were taken from the report of the bureau of agriculture, labor, and industry for 1911–12. The amount of taxes levied by the state was computed by applying the rate in 1912 to these valuations. The total rate of levy for state purposes was 6¾ mills, of which 2½ mills was for the general fund, 3½ mills for the state bounty fund, one-half of 1 mill for the state stock indemnity fund, and one-fourth of 1 mill for the bond fund. No levy for schools was made in 1912 by the state government.

The only civil divisions, other than the state and counties, reporting levies for purposes other than schools, were cities and villages, while the corresponding civil divisions reporting levies for schools were the local school districts. The levies made by the counties for schools and for other purposes and the levies made by the municipalities were secured by agents of the Bureau of the Census, while the amounts shown as levied by the local school districts represent the amount of special district taxes collected in the year 1912–13 and were secured from the department of public instruction at the state capital.

The only segregation shown by the state report for the real estate is land valued at $83,183,757; and all other, $96,709,140.

Personal property was shown to consist of live stock valued at $33,900,269; and all other, $64,276,120.

Reported in the column headed "Other property" is the operative property of railways valued at $68,481,299.

NEBRASKA.

With the exception of the general operative property of railway and car companies assessed by the state board of equalization, all property is locally assessed as of the 1st day of April. Real estate is assessed once in four years, with annual adjustments to meet changes in values of over $100, and personal property is assessed annually. Included in the local assessment is the property of telegraph, telephone, express, and pipe-line companies, a class of property which, together with the property of railway and car companies, is usually assessed by a state board. Certain of the cities make independent assessments for purposes of municipal taxation.

The assessed valuations and the amounts of taxes levied by the state for school and other purposes were taken from the report of the auditor of public accounts for 1911–12. The state levy in 1912 was for three funds—general, state bridge, and university. All other levies were secured by agents of the bureau or by correspondence.

Included in the levies made by civil divisions other than the state and counties are those made by cities, villages, precincts, and townships. Drainage districts, being maintained by special assessments based on the assumed amount of benefit, did not report a levy of ad valorem taxes in 1912. The corresponding civil divisions reporting levies for schools were the local school districts.

Real estate consisted of improved lands valued at $197,776,749; unimproved lands, $30,964,388; improvements on lands, $20,527,908; improved city and village lots, $26,756,122; improvements on lots, $36,663,131; and unimproved city and village lots, $6,361,329.

Personal property consisted of live stock valued at $27,509,783; notes secured by mortgage, $6,397,154; other notes, $2,952,652; money on hand or on deposit, $5,157,418; pianos, organs, etc., $1,172,993; merchandise, $9,515,147; bank stock, $6,936,528; and all other personal, $29,295,721.

"Other property" consisted of railroads valued at $55,050,286; property of Pullman Co., $125,085; and property of private car companies, $209,495.

NEVADA.

In Nevada all property is assessed by local officials, but in making the assessment on the operative property of railway, telegraph, telephone, and electric light and power companies, and on the value of cattle and sheep, these local assessors act collectively as a state board. The assessment of property generally does not refer to any particular date, and is made between the first Monday in March and the first Monday in September. Included in the value of real estate is the value of railroad tracks, and in the value of personal property is included the value of the rolling stock of railroads, a class of property which in most states is given a separate classification and included in the column headed "Other property."

The assessed valuations shown in Tables 7 and 8 were taken from the 1912 report of the state comptroller. The state levy for schools was computed by applying the rate of levy specified by the Revised Statutes of 1912, $0.114 per $100 of assessed valuation. The state levy for other purposes is the difference between the amount thus obtained and the total state levy for all purposes, as shown by the report of the comptroller referred to. The total county levy was taken from the report of the state comptroller, supplemented by reports returned by agents of the bureau. The county levy for schools was computed by applying the rate of the county levy for common schools and for county high schools, as shown by the state school report for 1911–12, to the total assessed valuation. The levies by other civil divisions for purposes other than schools represent levies made by the incorporated cities and villages, while the levies shown by other civil divisions for schools represent the amounts of the school district taxes collected during the year 1912.

No details are shown as to the classification of real and personal property, and the only two items shown by the comptroller's report for personal property are

those listed as "Net yield of mines," $8,732,861, and "Personal property," $8,686,696.

NEW HAMPSHIRE.

With the exception of the operative property of railroad, railway, telegraph, telephone, express, and car companies, which is assessed by the state tax commissioners, and of savings banks, trust companies, etc., which report to the state treasurer, all polls and property are assessed by the selectmen and the assessors of the towns and cities as of April 1 in each year.

Public utility companies pay to the state, upon assessed valuations determined by the tax commissioners, an ad valorem tax computed at the average rate paid by other property for local purposes. A portion of this tax is apportioned to the various towns, and a portion is used for state purposes. In Tables 7 and 8 the entire amount is shown as a state tax.

The equalized assessed valuations and the total amount of taxes levied, as well as the amounts levied by school districts, towns, etc., were taken from the report of the tax commissioners for 1912. The amounts of taxes levied by the counties were secured by agents of the Bureau of the Census, and the amounts levied by the state were taken from the state treasurer's report for 1913.

No details are shown of the equalized valuation of real estate or personal property. The unequalized valuation, which was $10,438,500 less than after equalization, shows that real estate consisted of lands and buildings valued at $257,149,769, and mills, factories, and machinery, $39,623,571. Personal property consisted of live stock valued at $11,472,520; moneys, credits, etc., $20,211,740; stock in trade, $31,104,187; polls, $11,942,200; and all other, $5,533,542.

The equalized value of "Other property" consisted of railways valued at $55,579,315; telephones, $3,327,750; telegraphs, $215,000; and express and parlor car companies, etc., $913,538.

Unclassified property to the value of $3,668,000, located in unincorporated places, has been classified in the tables as real estate.

NEW JERSEY.

The property in New Jersey subject to state taxation varies greatly from that subject to county and local taxation. With the exception of a levy for school purposes, which applies to all property in the state, the ad valorem tax levy by the state government is confined to what is popularly known as the "main stem" of railroad and canal property. This property is assessed by the state board of assessors and taxed for state purposes at the average rate of taxation on all property assessed for local purposes. In 1912 the valuation of this property was $221,931,053, upon which the state levied a tax of $4,508,948. All other property is assessed annually in each "taxing district," which may be the township, village, town, city, or ward or district in the city, and refers to the 20th day of May.

The assessed valuations shown in Tables 7 and 8 represent the valuations upon which the state school tax and the county taxes were levied, and were taken from the report of the state comptroller, 1912, as were also the tax levies made by the state for school purposes and the levies by local taxing districts.

The levies made by civil divisions other than the state and county were those made by the townships, boroughs, and cities. While each of those divisions constitutes a separate school district and levies taxes for the support of schools, it was impracticable to show separately the amounts levied for schools. They are therefore included with the levies for other purposes.

The real property valuations as shown in Tables 7 and 8 include all lands and improvements thereon, mines, quarries, peat and marl beds, and fisheries. Personal property includes chattels, debts, public and corporate stock, etc. No separate statement of the equalized value of these separate classes of property was obtained. The value of second-class railway property has been reported as "Other property."

NEW MEXICO.

With the exception of the operative property of railroad, telegraph, telephone, and other transportation or transmission companies, which is assessed by the state board of equalization, all property is annually assessed by local assessors as of January 1.

The assessed valuations and the state tax levy for schools and for other purposes presented in Tables 7 and 8 were taken from the report of the traveling auditor and bank examiner for 1912. The total rate of levy by the state in 1912 was 13.5 mills, of which five-tenths of a mill was for school purposes and 13 mills for other purposes.

The county levies for schools and for other purposes, as well as the levies made by the cities, villages, and local school districts, were secured by agents of the bureau.

The civil divisions, other than the state and counties, reporting levies for purposes other than schools, were cities and villages, while those levying for schools, in addition to the state and counties, were the local school districts.

As the property of mines, irrigation districts, tanning factories, and railroads, which is exempt from taxation for certain periods, and which amounted to $4,655,169, is not classified, no details can be shown for the taxable value of real estate. The total valuation of real estate, including these exemptions, and amounting to $39,337,596, is distributed as follows: Land, $21,447,437; improvements, $5,110,046; city and town lots, $4,954,592; improvements on town and city lots, $7,825,521.

Personal property consisted of live stock valued at $8,926,601; merchandise, $2,879,136; money, bonds, bank stocks, etc., $1,618,091; household goods, etc., $1,240,928; and all other personalty, $2,338,892. The valuation of "other property" included that of railroads, amounting to $20,404,458, and that of telegraph and telephone companies, amounting to $366,921.

NEW YORK.

In New York all real and personal property is assessed by the local assessors, usually between the 1st of May and the 1st of July. The value of special franchises is fixed by the state board of tax commissioners, and is the basis for state, county, and local taxation.

The assessed valuations presented in Tables 7 and 8 were taken from the report of the state board of tax commissioners for 1912 and represent the valuations fixed by local assessors before equalization by the state board. The valuations arrived at by the state board are used only as a means of determining the amount of state taxes to be apportioned to the various counties. The state taxes are then levied by the local assessors upon the local valuations. Omitted from the tables are both the assessed valuations and the amounts of taxes levied upon state and national bank stock. The value of a share of such stock is arrived at by combining the capital, surplus, and undivided profits, and dividing by the number of shares. Against the valuation thus arrived at is levied a tax of 1 per cent, one-half of which goes for the support of the state government and one-half to the municipality in which the bank is located.

The amounts of taxes levied by the state and counties were also taken from the report of the state board of tax commissioners, and the levies made by the towns, cities, and villages were taken in part from that report and in part were secured by agents of the Bureau of the Census.

Civil divisions, other than the state and counties, showing levies for purposes other than schools, were cities, villages, and towns, while the corresponding divisions showing levies for schools were the local school districts.

Real estate consisted of the real property, and improvements thereon, of individuals and corporations and also the special franchise valuations of corporations, as follows: Special franchises valued at $533,790,692; steam railroads, including the total assessment of such roads, even though a portion of the system may be operated by electric power, $395,795,885; electric roads, $269,070,890; gas, electric light, heat, and power corporations, $187,230,338; water corporations, $12,882,114; telephone and telegraph corporations, $77,662,112; miscellaneous corporations, $331,339,324; and other real property and improvements, $8,876,518,833.

No details are given in the report of the valuation of personal property.

NORTH CAROLINA.

With the exception of the operative property of railway, telegraph, telephone, express, and other public utility companies, which is assessed by the state corporation commission, all property is assessed locally as of the 1st day of May. The assessed valuations, as well as the levies made by the state and local taxing authorities, are taken from the report of the state tax commission for 1913, supplemented by data secured by agents of the Bureau of the Census.

The levies made by civil divisions other than the state and counties include those made by cities, villages, and townships, while the levies for the corresponding divisions for schools represent those made by the local school districts.

Real estate consisted of land valued at $228,476,981; town lots, $142,722,527; manufacturing properties outside of incorporated towns, $7,894,906; and mineral and quarry lands, $3,681,549.

Personal property consisted of solvent credits valued at $53,173,058; goods, wares, and merchandise, $31,142,184; cotton, tobacco, turpentine, etc., $22,496,805; household and kitchen furniture, $12,251,477; live stock, $47,106,206; corporate excess and bank and building and loan association stock, $28,120,971; money on hand or on deposit, $7,659,220; shares of stock, bonds, etc., $4,546,313; automobiles and pleasure boats, $2,200,898; provisions, $6,270,633; farming utensils, $3,152,898; and all other, $25,505,908.

"Other property" consisted of railway, telegraph, telephone, and other property assessed by the corporation commission, details of which were not secured.

NORTH DAKOTA.

In North Dakota the assessment of property subject to ad valorem taxation is made annually as of April 1. The operative property of railway, telegraph, telephone, and other public service corporations is assessed by the state board of equalization, while real and personal property generally is assessed by local officials.

The assessed valuations and the amounts of taxes levied by the state and local taxing authorities were taken from the report of the state board of equalization for 1913. The state levy is shown by the state report under six general headings: "General fund," "state bond and interest fund," "state bond sinking fund," "bovine tuberculosis fund," "glandered horse fund," and "educational institution fund." In the levies made by civil divisions, other than the state and counties, for purposes other than schools, are included the levies made by cities, villages, and townships, including as a township tax that known as the delinquent road tax, while the corresponding divisions showing levies for schools were the local school districts.

Real property, as shown by the report of the state board of equalization, consisted of land, exclusive of structures and improvements, valued at $158,611,055; structures and improvements on land, $10,626,670; town and city lots, exclusive of structures, $11,632,524; and structures on town and city lots, $18,200,350.

No details are given of the valuation of personal property, under which heading, following the local practice, the property of railway, telegraph, and telephone companies, etc., is included.

OHIO.

With the exception of real estate, which is assessed quadrennially with annual adjustments where changes in value of over $100 occur, all property is assessed annually, the property of public utility companies by the state tax commission, and other property by local assessors. The last assessment of real estate was made in 1910. In so far as the relation of the assessed valuation to the true value was concerned, this assessment, made under the direction of the newly created tax commission, differed materially from former assessments, property being listed for taxation at its true value instead of about one-third of such value, as in previous years. This change in the basis of assessment explains an increase in the assessed valuation from $1,990,885,388 in 1902, to $6,481,059,158 in 1912, as shown in Tables 7 and 8. In 1912 the only ad valorem tax levied by the state was for the sinking fund, state university and common school funds, the aggregate rate of levy for these purposes being 451 thousandths of 1 mill on the dollar.

All data appearing in Tables 7, 8, and 9 were taken from the report of the state auditor for 1912 or from records in the office of that official.

The levies for purposes other than schools, by other civil divisions, consist of levies by cities, villages, and townships, while the corresponding levies for schools include those of townships, special districts, subdistricts, and all other levies for school purposes.

Of the total valuation of real estate, $2,599,395,521 represents the valuation of property in cities and villages, while $1,736,270,000 represents that of rural property.

Included in the valuation of personal property is that of steam and electric railroads, which in most states is given a separate classification from real estate or personal property and included in the column headed "Other property" in Tables 7 and 8. The valuation of steam railroads was $619,054,183, and of electric railroads, $135,837,480. Other items of personal property valuations were live stock valued at $149,567,507; merchandise, $159,696,476; manufacturers' stock, $268,189,635; moneys and credits, $267,391,263; banks, $147,271,455; bonds, stocks, etc., $39,364,740; automobiles, $20,776,771; pianos and organs, $20,890,704; and other personal property, $317,353,423.

OKLAHOMA.

Under the constitution of Oklahoma, adopted in 1907, the assessment of all property, except that of public service corporations, which is assessed by the state board of equalization, is made annually by local assessors, as of the 1st day of January. The assessed valuations shown by the tables were taken from the report of the state auditor for 1910–1912, and represent the valuations after equalization by the state board, upon which all taxes, state and local, are based. The state levy in 1912 was $0.225 per $100 of assessed valuation, of which $0.025 was for schools, and $0.20 for other purposes. The amounts shown as the state levies were obtained by applying these rates to the assessed valuations.

Civil divisions, other than the state and counties, reporting levies for purposes other than schools, were cities, villages, and townships. The amounts given are based on reports secured by agents of the Bureau of the Census and by correspondence. In the case of a number of counties the township levies could not be secured. Appearing as levies by other civil divisions for schools are the levies made by the local school districts. The amounts shown in the tables represent the taxes collected in 1912, rather than the actual amounts levied, and were taken from reports secured by agents of the bureau. The levies made by the counties for schools and other purposes were also secured by agents of the bureau. In addition to the counties which made a specific levy for the support of schools, a number of them made appropriations for this purpose, but the appropriations are not included in the levies for schools.

No details of the valuations of personal property are given in the auditor's report. Real estate is shown to consist of land and improvements valued at $453,022,574; and city, town, and village lots and improvements, $266,680,865. The valuations shown in the column headed "Other property" include the property of railroads valued at $194,197,120; pipe lines, $43,117,095; street railway and interurban lines, $5,049,979; electric light, heat, water, power, and gas companies, $8,018,399; Pullman Co., $932,680; express companies, $802,905, and telegraph and telephone companies, $7,691,871.

OREGON.

With the exception of the operative property of railway, telegraph, telephone, and other transportation and transmission companies, which is assessed by the state tax commission, all property is assessed annually by local assessors as of the first Monday in March.

The assessed valuations, as well as the amounts of the state levies for schools and for other purposes, shown in Tables 7 and 8, were taken from the report of the state tax commission for the year 1913. The valuations given, with the exception of the operative property of transportation and transmission companies, represent

the local assessment before equalization by the state board. The equalization of the local assessments made by the state board is only for the purpose of determining the amount of state taxes which should be apportioned to the various counties. The county officials make the levy upon the local valuations.

The levies shown by civil divisions, other than the state and counties, for schools represent the levies of the local school districts, and were obtained by applying to the assessed valuation of the county the average rate of levy for 1912, as shown in the report of the superintendent of public instruction for the year 1913. The amounts levied by counties and other minor civil divisions were secured by agents of the Bureau of the Census. The levies of other civil divisions for purposes other than schools represent the levies made by road districts, dike districts, and port districts.

Real estate consisted of tillable lands valued at $231,871,030; nontillable lands, $108,018,708; improvements on deeded or patented lands, $22,648,736; town and city lots, $225,801,631; improvements on town and city lots, $83,839,645; improvements on lands not deeded or patented, $1,258,149; and all other, $1,428,740.

Personal property consisted of live stock valued at $23,641,369; merchandise and stock in trade, $28,757,304; money, notes, accounts, and shares of stock, $32,753,209; household furniture, etc., $13,011,633; and other personal property, $20,065,027.

In "Other property" is included the operative property of railroad companies valued at $76,524,234; sleeping car companies, $397,447; union station and depot companies, $4,192,500; electric and street railway companies, $24,874,542; express companies, $776,459; telegraph companies, $414,574; telephone companies, $4,643,402; refrigerator car companies, $81,151; and oil and tank line companies, $12,189.

PENNSYLVANIA.

In Pennsylvania the classes of property subject to ad valorem taxation for state purposes and for county purposes differ materially. Only certain classes of intangible personalty, including mortgages, moneys and credits, etc., and vehicles for hire, are taxed for state purposes. Three-fourths of the taxes thus collected are returned to the counties. All real estate, live stock, mortgages, judgments, etc., are taxable for county purposes. Railroads and other transportation and transmission companies are not taxed under the ad valorem system, but are taxed for state purposes on the capital stock, gross receipts, domestic bonds held by them, and the bonus on charters.

The assessment for county purposes is made triennially, and refers to the second Monday in September. Adjustments on account of the increases or decreases in valuations are made annually.

The assessed valuations presented in Tables 7 and 8 represent the valuations subject to county taxation, including the valuation of professions, trades, and occupations. The total of this valuation in 1912 was $5,068,802,988, as compared with $1,264,178,357, subject to taxation for state purposes.

The amounts shown as the total taxes levied represent the total amount of taxes collected, and were taken from the annual report of the secretary of internal affairs, as were also the actual amounts of tax levies for state and county purposes.

The amounts of levies made by cities and boroughs, as shown in Table 9, were secured by agents of the Bureau of the Census.

Civil divisions, other than the state and counties, levying taxes for purposes other than schools were cities, villages, boroughs, and townships, while the amounts shown as levied by other civil divisions for school purposes represent the total local levies for education.

No details are shown for the value of taxable real estate or of personal property, and "Other property," which in most states consists of the operative property of railroad, telegraph, and telephone companies, is not subject to the general ad valorem tax and does not, therefore, appear in the tax roll.

RHODE ISLAND.

Taxation in Rhode Island is administered almost entirely by the towns. State taxes are apportioned among the towns on the basis of a fixed valuation revised at long intervals by the general assembly. The local valuations upon which the levies of the state and other civil divisions are based are obtained annually by local assessors. There does not appear to be any uniform date to which the assessment refers, each town being at liberty to determine for itself when the assessment shall be made. The counties are merely judicial districts and have no independent treasuries or revenues.

The assessed valuations appearing in Tables 7 and 8, as well as the amounts of taxes levied and the amount of the state tax, were taken from the Rhode Island Tax Report for 1913. No separation could be made of the levies by the different civil divisions for schools and those for other purposes, nor could any details be shown of the valuation of real and personal property, which includes the valuation of the property of railway, telegraph, and telephone companies, classes of property which in most states are given a separate classification and reported in the column headed "Other property."

SOUTH CAROLINA.

In South Carolina real estate is listed for taxation every fourth year, with annual changes on account of increases or decreases in values, while personal property is listed annually. With the exception of the operative property of railroads, which is assessed by the state board of assessors, all property is assessed by local authorities.

The assessed valuations of the counties and the levies by the state, counties, townships, and school districts were taken from the report of the comptroller general, part 2, 1912, while the assessed valuations and levies for cities of over 2,500 inhabitants were secured by agents of the Census Bureau.

The levies appearing in the column headed "Other civil divisions" for purposes other than schools are those made by cities, villages, and townships, while those shown in the corresponding column for schools were made by local school districts, cities, and villages.

Real estate consisted of land valued at $72,861,369; improvements thereon, $18,121,207; and town lots and improvements, $61,069,722.

Included in the valuation of personal property are the following items: Valuation of live stock, $17,228,055; merchandise and manufacturing property, $16,629,862; manufactured articles on hand, etc., $22,822,306; credits, stocks, bonds, and bank returns, $13,142,103; and other personal property, $26,297,080.

The valuation of the operative property of railroads is presented in the column headed "Other property" of Tables 7 and 8.

SOUTH DAKOTA.

In South Dakota, with the exception of the operative property of railway, telegraph, telephone, express, and sleeping car companies, all property is assessed annually as of the 1st day of May by the local assessors. An assessor's district comprises an organized civil township, a city, or the portion of each county not fully organized into civil townships.

The assessed valuations shown in Tables 7 and 8, as well as the amounts of taxes levied by the state and the minor civil divisions, were taken from the reports of the state auditor for 1912 and 1913. The amounts of levies made by the cities of over 2,500 inhabitants, shown in Table 9, were taken from schedules secured by agents of the bureau.

Civil divisions, other than the state and counties, reporting levies for purposes other than schools, were the cities, villages, and townships, while the corresponding divisions reporting levies for schools were the independent school districts.

Real estate consisted of agricultural lands and improvements valued at $219,990,547; mineral lands, $3,888,451; and town lots and improvements, $40,284,186.

Personal property consisted of live stock valued at $27,463,088; goods and merchandise, $8,187,264; bank stock, $3,902,616; agricultural tools, implements, and machinery, $2,207,743; and all other, $14,156,566.

"Other property" consisted of railways valued at $32,001,040; telegraphs, $329,739; telephones, $1,146,555; property of express companies, $660,618; and property of sleeping car companies, $60,000.

TENNESSEE.

In Tennessee, with the exception of "localized property," which includes the depots and other property with an actual situs, the property of railway, street railway, telegraph, and telephone companies is assessed by the state tax assessors. All other property, including the localized property of these corporations, is assessed by the county assessors, personal property being assessed annually and real estate every two years, with annual adjustments on account of changes in value to the extent of $200.

The assessed valuations, as shown in the tables, were taken from the state comptroller's report for 1911–12, and represent the valuations after equalization by the state board. The state levy for 1912 was 5 mills, of which 1.5 mills was for schools and 3.5 mills for other purposes. The levy for schools is administered entirely by the state superintendent of schools and the local county superintendents of schools, and is locally treated as a county tax. It is, however, included in Tables 7 and 8 as a state levy. In addition to this levy by the state for schools, there is also appropriated under the laws of 1909, 25 per cent of the revenues from other sources. The county levy for schools and for other purposes was obtained by applying to the total assessed valuation the tax rates given in the state comptroller's report. The only civil divisions, aside from the state and counties, which levy taxes in Tennessee, are the cities and villages. These levies are reported under "Other civil divisions," and are based on reports secured by agents of the Bureau of the Census.

No details of personal property are given in the comptroller's report, and the only segregation of real property is between land and improvements valued at $217,165,104, and town and city lots and improvements, $230,387,312.

"Other property" consisted of railroads valued at $81,252,530; street railways, $13,655,515; property of telegraph companies, $857,881; and property of telephone companies, $3,909,980.

TEXAS.

With the exception of the value of the franchises of railroads, which is assessed by the state tax board, all property in Texas is assessed annually by county assessors as of the 1st day of January, this assessment being the basis of state and county taxes. The assessment of the franchise valuation of railroads is in pursuance of a law passed in 1907 and adds greatly to the assessed valuation, the total in 1902 amounting to $87,651,771, while in 1912 the corresponding valuation was $337,870,572. City councils have power to provide by ordinance for independent assessments for the purpose of municipal taxation.

The assessed valuations and tax levies by the state and county governments were taken from the report

of the state comptroller for 1912, while the other information was secured by agents of the bureau.

Included in levies by other civil divisions for purposes other than schools are the levies made by cities, villages, and a few road districts, while the corresponding levies for schools include levies by local school districts. In a number of counties the total local levy for schools could not be secured, and the amount shown in the table is somewhat less than the actual levy. The total levy made by these districts, as shown in Tables 7 and 8, was $5,638,458, while for the year ending August 31, 1911, the state superintendent of public instruction in his annual report showed that they derived $6,821,981 from local taxes.

The comptroller's report shows no details of real estate, the total assessed valuation of which was $1,650,198,381, except land and improvements valued at $1,077,061,879, and town lots and improvements, $573,136,502.

Personal property consisted of live stock valued at $156,022,011; goods, wares, and merchandise, $93,464,760; moneys and credits, $76,828,769; state and national banks, $68,489,846; manufacturers' tools, implements, and machinery, $24,051,710; vehicles, $19,524,886; and other personal property, $89,170,218.

"Other property" consisted of railroad tracks valued at $144,478,084; rolling stock, $30,829,171; franchises, $162,363,317; street railways, $6,411,545; and telegraph and telephone companies, $10,877,352.

UTAH.

In Utah all property and franchises, except those derived from the United States, owned by railway, street railway, telegraph, telephone, and other public utility companies, operating in more than one county, are assessed by the state board of equalization. All other property is locally assessed as of the 1st day of January. The assessed valuations and the amounts of taxes levied by the state governments, as shown in Tables 7 and 8, were taken from the report of the state auditor for 1911–12. The state levy in 1912 was 7½ mills, of which 4 mills was for general state purposes, 3 mills for district schools, and one-half of 1 mill for state high schools.

Civil divisions, other than the state and counties, reporting levies for purposes other than schools, were cities and villages, while the corresponding civil divisions reporting levies for schools were the local school districts. In the case of cities and villages the amounts of levy were secured by agents of the Bureau of the Census and by correspondence, while in the case of the school districts the amounts given were secured from the report of the state superintendent of public instruction and represent the amounts received from ad valorem taxes during the year.

Real property consisted of lands valued at $66,124,775; and improvements on lands, $43,501,073.

Personal property consisted of merchandise and store fixtures valued at $11,021,105; live stock, $10,875,654; machinery, tools, etc., $7,170,663; moneys and credits, $7,512,845; property of sugar, water, and mining companies, $3,257,448; and all other, $7,365,312.

"Other property" consisted of railroads valued at $31,826,091; telegraph companies, $333,218; telephone companies, $1,618,729; and other public utility companies, $9,692,294.

VERMONT.

The general ad valorem tax in Vermont is administered by the towns, each town being held responsible in its corporate capacity for its share of state and county taxes. A peculiar feature of the system of administration of ad valorem taxes is that 1 per cent of the assessed valuation comprises what is termed the "grand list" upon which the tax rate is based. This rate, as shown by the reports of the state, being based upon so small a portion of the valuation, is excessively high. Following the methods used by the Bureau of the Census in 1890 and 1902, the 1912 figures in the tables show the entire 100 per cent under assessed valuation. Exempt from the general property tax is the operative property of railway, telegraph, telephone, express, and other transportation and transmission companies, which pay, in lieu of this tax, a certain per cent on the gross earnings. The assessed valuations, however, include the polls, which are given a valuation of $200 each, and taxed at the ordinary ad valorem rate for state and local purposes.

The assessed valuations and amounts of levies made by the state and minor civil divisions were taken from the report of the commissioner of taxes for 1912.

Civil divisions, other than the state and counties, reporting levies for purposes other than schools, and for schools, were villages, towns, and fire districts.

No details are shown in the printed report of the state of either real estate or personal property, while "Other property," not being subject to ad valorem taxation, is not included in the assessment list.

VIRGINIA.

While the general assessment of real estate throughout the state is made but once every five years, an annual land book or list of the taxable real estate is made by the commissioners of revenue in the several counties, cities, and districts, who may make changes from the quinquennial assessment on account of improvements. Personal property is assessed annually as of February 1. The property of railway, telegraph, telephone, and other intracounty transportation and transmission companies is assessed annually by the state corporation commission.

The assessed valuations of real and personal property, shown in Table 8, were taken from the state

auditor's report for 1912, and represent what is locally known as "Schedule B" and "Schedule C," while the assessed valuations of transportation and transmission companies shown in the column headed "Other property" were taken from the report of the state corporation commission for the year 1912.

The amount of taxes levied by the state was computed by applying the rate of levy to the total assessed valuations thus obtained. In 1912 this levy consisted of 1 mill for schools, 2 mills for general purposes, and one-half of 1 mill for Confederate pensions. The county levy for schools and other purposes was computed in the same manner from the rates of levy shown in the same report, supplemented by reports returned by agents of the bureau. Included in the county levy is the so-called district levy for roads. The levies reported by civil divisions, other than the state and counties, for purposes other than schools, were made by cities and villages, while the corresponding divisions reporting levies for schools were local school districts. The amounts entered under this heading represent the receipts during the year, rather than the actual amounts levied, and were taken from the report of the state auditor for the year 1913.

Real estate consisted of land valued at $151,338,387; improvements thereon, $69,754,149; city and town lots, $122,799,051; improvements thereon, $165,579,360; and mineral and timber lands and improvements, $29,453,599.

Personal property consisted of live stock valued at $35,528,085; household furniture, etc., $25,531,791; moneys, credits, etc., $79,289,852; capital invested, $26,294,253; and other personal property, $28,304,237.

"Other property" consisted of the operative property of steam railroads and canals valued at $110,634,189; electric railways, $7,820,968; property of telegraph, telephone, steamboat, express, and sleeping car companies, $4,993,075, which includes $18,312, value of river crossings and submarine cables, not distributable by counties and not included in the table; and light, heat, gas, water, and power plants, $7,659,937.

WASHINGTON.

In Washington the operative property of railroad and telegraph companies is assessed annually by the state board of tax commissioners, while real and personal property are assessed by local assessors, the former biennially, in the even-numbered years, and the latter annually. The valuations of real estate, however, are adjusted in the odd-numbered years to meet changes in values. The assessment of all property relates to March 1.

The state levy is based upon local valuation, the valuations by the state board of equalization being used only as a means to determine the amount of taxes which shall be apportioned to each of the counties.

The assessed valuations shown in Tables 7 and 8 are the valuations as reported by the local assessors and were taken from the report of the state board of equalization for the year 1912, while the taxes levied by the state and by the minor civil divisions were taken from the report of the state tax commission for the year 1913. Civil divisions, other than the state and counties, reporting levies for purposes other than schools, were cities and villages, and drainage, dike, port, and river improvement districts, while the corresponding divisions reporting levies for schools were local school districts. Drainage and other special districts are not general throughout the state, drainage districts being reported from King, Klickitat, Lewis, Pacific, Skagit, Snohomish, Thurston, Whatcom, and Yakima Counties; dike districts from Pacific, Pend Oreille, Skagit, Snohomish, and Yakima Counties; port districts from Chehalis, Clarke, and King Counties; and river improvement districts from Clallam, King, and Pierce Counties.

Real estate consisted of timberlands valued at $89,379,888; other improved lands, $62,568,084; improved lands, $159,642,119; improvements on lands, $24,834,424; city and town lots, $269,335,554; and improvements on city and town lots, $123,991,331.

Personal property consisted of live stock valued at $18,709,717; household furniture, $16,953,471; goods and merchandise, $28,904,290; manufacturers' tools, implements, and machinery, $10,786,795; capital stock of incorporated banks, $13,326,974; property of gas, electric light, and other public service corporations, including franchises, $14,867,406; and all other, $14,400,867.

"Other property" consisted of the operative property of steam railroads valued at $135,522,077; electric railways, $21,505,299; and telegraph lines, $357,955.

WEST VIRGINIA.

The assessed valuations were taken from the 1911–12 report of the state tax commissioner.

The local assessment of real estate and personal property is made as of April 1. The property not locally assessed consists of the operative property of railroad, oil and gas, water and light, telephone and telegraph, and other public utility companies, and is assessed by the board of public works as of December 31. The assessment of this class of property by the state board is apportioned to the counties and by the counties to the school districts and municipalities.

The use of the general property tax for the support of the state government has been almost entirely abandoned within the past few years, the levy in 1912 amounting to but $116,727, as compared with a levy of $892,971 in 1902. State revenues are now secured principally from other sources.

The levies made by the state and other civil divisions, as shown in Tables 7 and 8, were taken from the report of the tax commissioner. The civil divisions for which

levies for purposes other than schools are shown consist of the cities and villages in the state, while the amounts shown as levied for schools are the levies made by the independent school districts. These school districts are coextensive with the magisterial districts and all taxes for school purposes are levied by such districts.

No details of the assessed valuation of real estate or of personal property are shown.

The valuation shown in the column headed "Other property" is distributed as follows: Operative property of steam railroads, $182,624,100; street railways, $11,690,000; oil and gas companies, $89,530,311; water and light companies, $3,203,992; telephone and telegraph companies, $4,853,856; and other corporations assessed by the board of public works, $3,126,160.

In 1902 only the valuation of the operative property of railroads and of the Pullman Co. was included under "Other property."

WISCONSIN.

In Wisconsin the operative property of railroad, street railway, telegraph, express, sleeping car, freight line, equipment, and light, heat, and power companies is subject to taxation by the state only. The total value of this property in 1912 was $386,581,000, and the amount of taxes imposed by the state government, computed at the average rate of state and local taxation on other property, was $4,188,564. Of the tax on street railways, 85 per cent is returned to the municipalities in which the companies operate. Property taxable locally is assessed by local assessors, and refers, in the case of real estate, to any date between the 1st day of May and the time of the sitting of the board of review, and in the case of personal property, the assessment relates to the 1st day of May, except that logs, timber, railway ties, etc., may be assessed at any time during April.

The assessed valuations shown by the tables were secured from the records of the Wisconsin tax commission, and represent the valuations upon which the local levies are based. While the tax commission equalizes the local assessment between the different counties, the valuation arrived at by such equalization is used only for the purpose of determining the amount of state taxes to be apportioned to the various counties. The tax levies shown for the state, counties, and other civil divisions were likewise secured from the records of the tax commission. Civil divisions, other than the state and counties, levying taxes for purposes other than schools, were the cities, villages, townships, and drainage districts, while the civil divisions, other than the state and counties, showing levies for schools were the local school districts.

No details of real or personal property were secured.

The valuations shown in the column headed "Other property" consisted of the following: Operative property of railroad companies, $333,959,000; street railway companies, and light, heat, and power companies operated in connection therewith, $47,365,000; telegraph companies, $1,961,000; and express, sleeping car, freight line, and equipment companies, $3,296,000.

WYOMING.

In Wyoming the operative property of railway, express, telegraph, telephone, and car companies is assessed by the state board of equalization. Other property is assessed by local assessors as of April 1. In the local assessment of live stock each county assesses at the same average valuation per head, which is fixed by the state board of equalization. The assessed valuations and the amounts of taxes levied by the state were taken from the report of the state auditor for 1911–12. The state levy for schools consisted of the levies for the Wyoming University and the Wyoming Industrial Institute. No levies were made by the state for common or public schools. The county levies for schools and for other purposes, the levies made by cities and villages, and those made by local school districts were secured by agents of the Bureau of the Census and by correspondence. The only civil divisions, other than the state and counties, reporting levies of ad valorem taxes were the cities, villages, and local school districts.

Real estate consisted of land and improvements valued at $53,036,493; and town lots and improvements, $28,234,007.

Personal property consisted of live stock valued at $25,412,840; capital employed in manufacture and merchandise, $8,586,235; stocks and shares in corporations, $2,837,802; vehicles, $1,367,691; mine output, $5,449,971; and other personal property, $4,312,057.

Included in "Other property" is that of railroads valued at $49,523,195; car companies, $989,531; and telegraph and telephone companies, $1,000,808.

TABLE 9.

Assessed valuations and levies of ad valorem taxes for municipal purposes.—Table 9 presents, for incorporated places having a population of 2,500 and over, the assessed valuations classified under the three headings: "Real property and improvements," "Personal property," and "Other property;" the total levies classified as "for purposes other than schools" and "for schools;" and the per capita assessed valuation and levies. The incorporated places are arranged by states, and for convenience of study those of each state are arranged in three groups according to population.

GENERAL TABLES

TABLE 1.—ASSESSED VALUATION OF ALL PROPERTY SUBJECT TO AD VALOREM TAXATION, BY GEOGRAPHIC DIVISIONS AND STATES: 1860 TO 1912.

[For a text discussion of this table, see page 10.]

[1] For purposes of comparison with state totals for other years, the combined valuation of real and personal property reported by the Tenth Census was decreased $32,668,566 by the Eleventh Census; but the proportion of this decrease which should apply to real property is not given, and therefore the valuation of real property remains unchanged.
[2] Dakota Territory.
[3] Combined assessed valuation of Oklahoma and Indian Territory.

TABLE 2.—ASSESSED VALUATION OF REAL PROPERTY AND IMPROVEMENTS SUBJECT TO AD VALOREM TAXATION, BY GEOGRAPHIC DIVISIONS AND STATES: 1860 TO 1912.

[1] Organized since 1902.
[2] Pinellas County organized in 1911 from part of Hillsborough County.
[3] Per capita not computed; population not estimated.
[4] Per capita based on population enumerated as of Apr. 15, 1910.
[5] Includes $12,719,776, assessed valuation of telegraph, telephone, express, Pullman, steamboat, and steamship property not distributable by counties.
[6] Includes $92,375 not distributable by counties.
[7] Includes $38,462,161 not distributable by counties.
[8] Includes $63,599, levy on valuation of telegraph, telephone, express, Pullman, steamboat, and steamship property not distributable by counties.
[9] Includes $152,310 not distributable by counties.

TABLE 6.—ASSESSED VALUATION OF ALL PROPERTY SUBJECT TO AD VALOREM TAXATION, AND LEVIES OF AD VALOREM TAXES, TOTAL AND PER CAPITA, BY COUNTIES: 1912, 1902, AND 1890—Continued.

[For a text discussion of this table, see page 14.]

[1] Per capita based on population enumerated as of Apr. 15, 1910.
[2] McCreary County organized in 1912 from parts of Pulaski, Wayne, and Whitley Counties.
[3] Per capita not computed; population not estimated.
[4] The figures for Allen, Beauregard, and Jefferson Davis Parishes in 1912 are included in those for Calcasieu Parish; could not be segregated.
[5] Evangeline Parish organized in 1911 from part of St. Landry Parish.
[6] Organized since 1902.

TABLE 6.—ASSESSED VALUATION OF ALL PROPERTY SUBJECT TO AD VALOREM TAXATION, AND LEVIES OF AD VALOREM TAXES, TOTAL AND PER CAPITA, BY COUNTIES: 1912, 1902, AND 1890—Continued.

[1] Per capita based on population enumerated as of Apr. 15, 1910.
[2] Organized since 1902.
[3] Mineral County organized in 1911 from part of Esmeralda County.
[4] Per capita not computed; population not estimated.
[5] Includes $60,035,603 not distributable by counties.
[6] Includes $83,543,645 not distributable by counties.
[7] Includes $930,553 not distributable by counties.
[8] Includes $926,270 not distributable by counties.

TABLE 6.—ASSESSED VALUATION OF ALL PROPERTY SUBJECT TO AD VALOREM TAXATION, AND LEVIES OF AD VALOREM TAXES, TOTAL AND PER CAPITA, BY COUNTIES: 1912, 1902, AND 1890—Continued.

[For a text discussion of this table, see page 14.]

[1] Per capita based on population enumerated as of Apr. 15, 1910.
[2] Includes $1,041,978 not distributable by counties.
[3] Includes $52,827,364 not distributable by counties.
[4] Includes $212,612 not distributable by counties.
[5] Charlottesville city separated since 1890.
[6] Alexandria city separated since 1890.
[7] Clifton Forge city separated since 1902.
[8] Staunton city separated since 1890.
[9] Lynchburg city separated since 1890.
[10] Manchester city separated since 1890.
[11] Winchester city separated since 1890.
[12] Richmond city separated since 1890.
[13] Excludes Williamsburg city which was independent of county organization in 1902.

Table 6.—ASSESSED VALUATION OF ALL PROPERTY SUBJECT TO AD VALOREM TAXATION, AND LEVIES OF AD VALOREM TAXES, TOTAL AND PER CAPITA, BY COUNTIES: 1912, 1902, AND 1890—Continued.

[For a text discussion of this table, see page 14.]

County.	Assessed valuation of all property subject to ad valorem taxation.						Levies of ad valorem taxes.					
	Total.			Per capita.			Total.			Per capita.

[1] Per capita based on population enumerated as of Apr. 15, 1910.
[2] Radford city separated since 1890.
[3] Norfolk and Portsmouth cities separated since 1890.
[4] Danville city separated since 1890.
[5] Roanoke city separated since 1890.
[6] Buena Vista city separated since 1890.
[7] Fredericksburg city separated since 1890.
[8] Newport News city separated since 1890.
[9] Bristol city separated since 1890.
[10] Made independent of county organization since 1890.
[11] Made independent of county organization since 1902.
[12] Annexed to Richmond city in 1910.
[13] Reverted to James City County since 1902.

TABLE 6.—ASSESSED VALUATION OF ALL PROPERTY SUBJECT TO AD VALOREM TAXATION, AND LEVIES OF AD VALOREM TAXES, TOTAL AND PER CAPITA, BY COUNTIES: 1912, 1902, AND 1890—Continued.

[For a text discussion of this table, see page 14.]

[1] Organized since 1902.
[2] Organized since 1890.
[3] Per capita based on population enumerated as of Apr. 15, 1910.
[4] Pend Oreille County organized in 1911 from part of Stevens County.
[5] Per capita not computed; population not estimated.
[6] Includes $72,000, valuation of the Pullman Car Co. not distributable by counties.

TABLE 6.—ASSESSED VALUATION OF ALL PROPERTY SUBJECT TO AD VALOREM TAXATION, AND LEVIES OF AD VALOREM TAXES, TOTAL AND PER CAPITA, BY COUNTIES: 1912, 1902, AND 1890—Continued.

[For a text discussion of this table, see page 14.]

[1] For places of 8,000 inhabitants and over, based on population estimated as of July 1, 1913; for places less than 8,000 inhabitants, based on population enumerated as of Apr. 15, 1910.
[2] Levy for schools included with that for purposes other than schools.
[3] Per capita based on population enumerated as of Apr. 15, 1910.
[4] The population of this town is over 30,000. It is included in this group instead of the one preceding, because not incorporated as a city.

TABLE 9.—TOTAL AND PER CAPITA ASSESSED VALUATION OF ALL PROPERTY SUBJECT TO AD VALOREM TAXATION, AND TOTAL AND PER CAPITA LEVIES OF AD VALOREM TAXES, OF INCORPORATED PLACES HAVING A POPULATION OF 2,500 AND OVER: 1912—Continued.

[For a text discussion of this table, see page 33.]

INCORPORATED PLACE.	ASSESSED VALUATION OF ALL PROPERTY SUBJECT TO AD VALOREM TAXATION.				LEVIES OF AD VALOREM TAXES FOR MUNICIPAL PURPOSES.			PER CAPITA.[1]	
	Total.	Real property and improvements.	Personal property.	Other property.	Total.	For purposes other than schools.	For schools.	Assessed valuation of all property.	Levy of ad valorem taxes.
